Dear Ms. Houske:

One of the conditions of approval of your water Permit No. 98-7098 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

La Chesmar Corporation
No. 3, Spur Lane
Rolling Hills, CA 90274

Dear Ms. Houske:

Your Permit No. 98-7098 grants the right to divert 0.03 cubic feet per second of water from an Unnamed Spring, to be used for domestic purposes for one household.

Under Item 7 of the permit, you listed one year in which to complete your system and apply the water to a beneficial use. We therefore approved the permit with the condition that proof of construction of works and application of the water to a beneficial use be submitted on or before January 1, 1975. Sixty days prior to this date, we will send you a "Beneficial Use" form. If at that time you have not completed the development and have not applied the water to a beneficial use, you should request an extension of time or your permit may lapse.

In answer to your last question, you should have completed development and beneficially used the water from the Spring by January 1, 1975.

We hope this has answered your questions. If we may be of any further assistance, please contact us.

Dear Mr. Houske:

An Application for Permit must be filed to develop a legal water right on any water diverted from a ground water source after March 25, 1963 (excepting a well drilled for a single household). Any surface water diverted after May 20, 1971, must also be preceded by an approved permit from this Department. The above includes proposed new systems and enlargements of existing systems for development of larger quantities of water (Section 42-201 through Section 42-229, Idaho Code).

Existing water rights developed through diversion and application of water to a beneficial use prior to the above dates, may be recorded by filing a Claim to a Water Right with our Department; however, it is not mandatory to do so (Section 42-225b, Idaho Code).

We have enclosed an Application for Permit form and also a Claim to a Water Right form for your use. Please complete the necessary form and return it to our office along with the required filing fee.

If we may be of further assistance, feel free to contact us.

Very truly yours,

Fred Eisenbarth
