Dear Mr. Walter,

RE: License No. 98-7032

In response to receiving the Assignment of Permit on License 98-7032, the Department has no provisions for changing licensed water rights ownership without filing a transfer. However, transfer applications are only used when a water right owner wants to change the place of use or point of diversion. I assume that this is not being done.

In Idaho a licensed water right is considered real property and ownership to the water right is acquired when the property to which the water right is appurtenant is purchased. Therefore, the proof of ownership to the water right is evidenced by the deed to the property.

I have put the assignment in the file for reference and no further action will be taken.

I hope this explanation will satisfy any concern you may have about your water right. If you have any further questions, please let me know.

Sincerely,

ROBYN HAMPE

Dear Mr. McGinnis:

A representative of this Department has made an examination of the works covered by your Permit No. 98-7032 and has found the following:

Quantity of water diverted: 0.06 cfs

Amount of water that can be recognized as beneficially used under Idaho law: 0.06 cfs

The maximum quantity diverted shall not exceed 2.6 acre feet per year.

Beneficial use: For domestic, stockwater, and fire protection purposes within the NE 1/4, NE 1/4, Sec. 17, Twp. 63 N, Rge. 2 E

Point of diversion: NE 1/4, Sec. 17, Twp. 63 N, Rge. 2 E, B.M.

Priority date established: November 5, 1970

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth in this letter.

Dear Mr. McGinnis:

One of the conditions of approval of your water Permit No. 98-7032 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen;

Your letter dated Dec. 16th requesting further information relative to subject permit is at hand.

The number of families to be supplied with water initially will be only one, however, provision is being made for the probability of two others to be added in the near future.

Fire protection with water will consist of house hydrants and hose.

The source of water consists of two similar springs located about 100 yards apart and approximately at the same level and will provide approximately 100 feet of head. As nearly as can be estimated each spring will supply .2 to .4 cu. ft. sec. of water during dry periods.

A rough sketch of the proposed system is enclosed here-with indicating dimensions, etc.

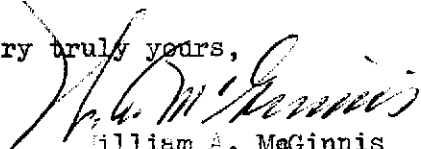

My original application requested .2 cfs, not 2.0. Because that application was made on the old form your office typed up an application for me on the current form, for some reason made the application as requesting 2.0 cfs and sent it to me for further correction and signature. I suspected this at the time.

Inasmuch as I intend to divert water from both springs to the same reservoir, no other party being involved (they being on my own property) and the potential supply appears to be able to furnish me with .4 cfs I request the application be altered to grant me .4 cfs of right. Two cubic foot seconds of water is a lot of water and is believed to be more than is available.

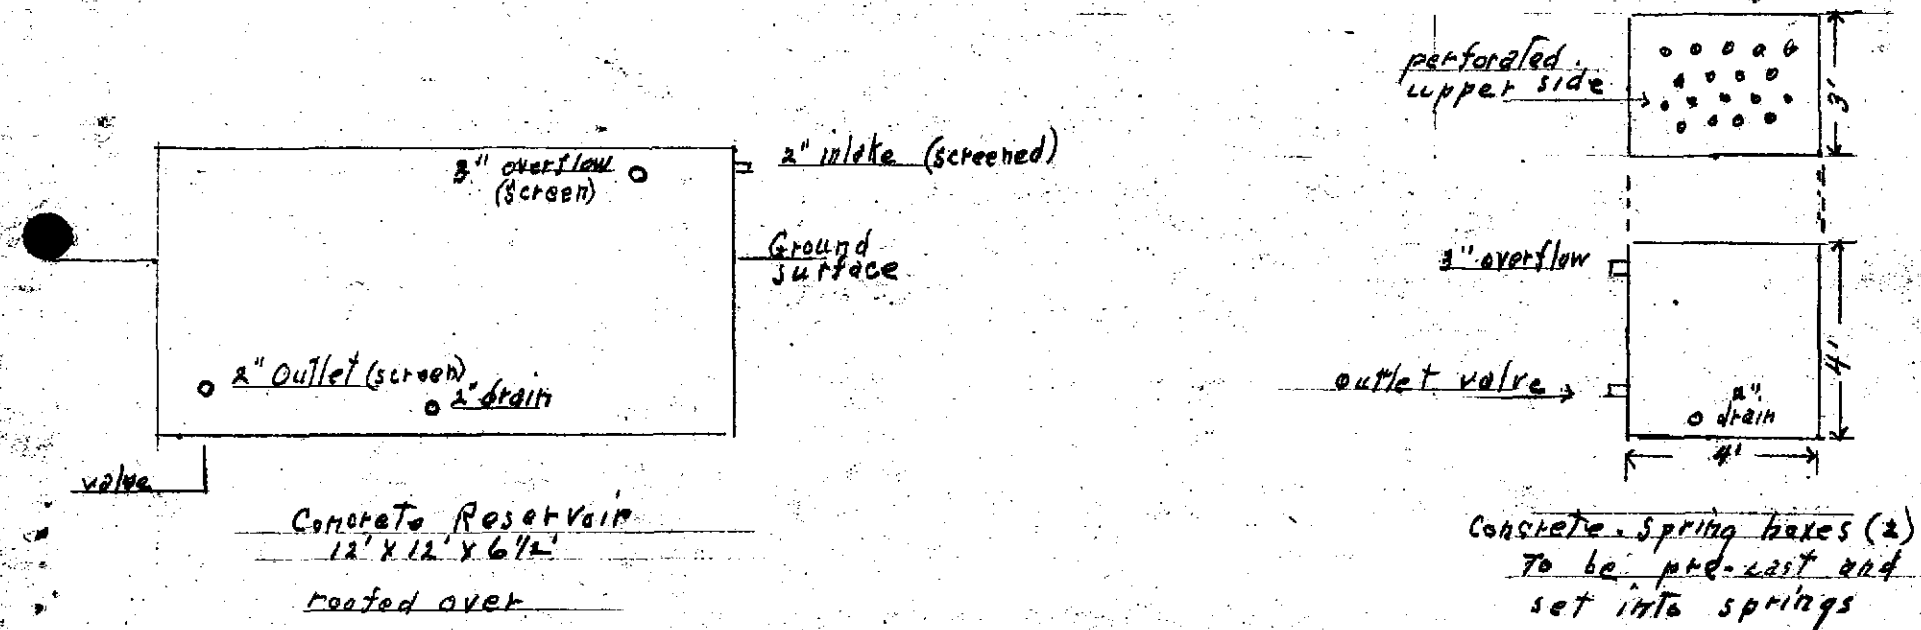

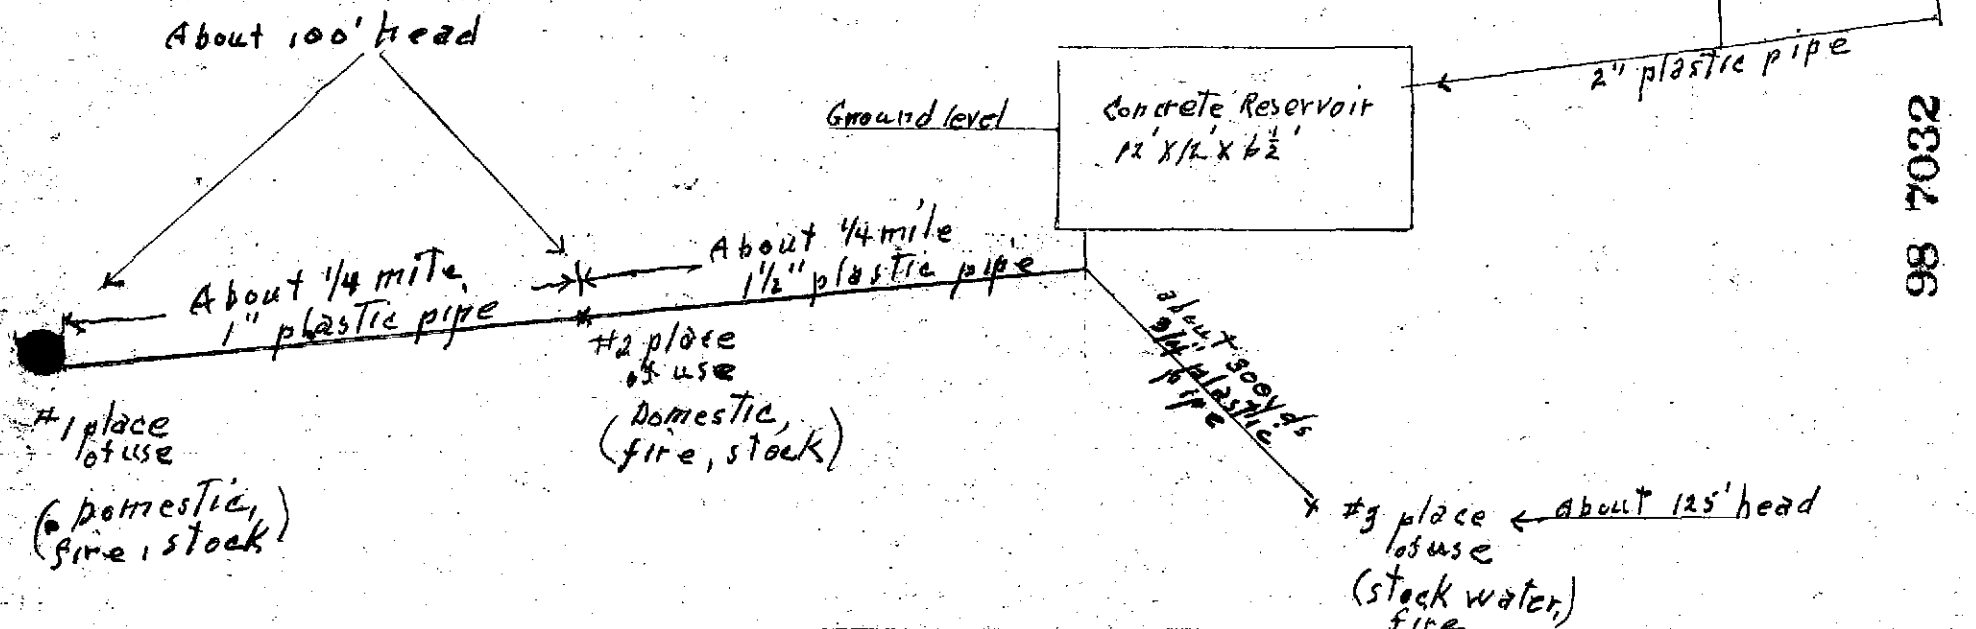

The enclosed rough drawing of the system I propose may prove to be adequate for my purpose and satisfy the interest of your engineering staff.

Thank you for your attention to detail.

Very truly yours,

William A. McGinnis

Dear Mr. McGinnis:

In the final evaluation of the above referenced application for permit, the department feels that we need more detailed information concerning the uses listed in the application. We need to know the number of families supplied with water, and what fire protection facilities you have. We will also need the average quantity of water the spring produces, the size of the spring box and storage tank, the length and grade of the plastic pipe. Our engineering department cannot determine with the information submitted to date, if your system could convey the 2.0 cubic feet per second requested in the application.

As soon as you have supplied us with this information, we shall continue with its processing.

If we may be of any further assistance to you, please do not hesitate to contact us.

Very truly yours,

Dorian Clay
