NOTICE OF AMENDED CLAIM TO A WATER RIGHT

Notice is hereby given that D. Bruce Quant filed a Claim to a Water Right No. 98-4064, claiming a right to the diversion and beneficial use of 3 gallons per minute of water from a spring, with the point of diversion in the NE1/4SW1/4 Sec. 26, T60N, R1W, B.M., Boundary County. The water was claimed to be used from Jan 1 to Dec. 31 for domestic purposes and from April 1 to Oct. 1 for the irrigation of 1 acre with a priority of prior to 1930. The place of use was within the NW1/4SW1/4 Sec. 26, T60N, R1W, B.M.

The claimant now proposes to amend Claim No. 98-4064, claiming 3 gallons per minute of water from a spring, with the point of diversion in the SE1/4SW1/4 Sec. 26, T60N, R1W, B.M., Boundary County. The water is claimed to be used from Jan. 1 to Dec. 31 for domestic purposes (1 GPM) and from April 1 to Oct. 1 for the irrigation of 1 acre (3 GPM) with a priority of prior to 1930. The place of use is within the NW1/4SW1/4 Sec. 26, T60N, R1W, B.M.

Any exception to this proposed amending of this claim of water right may be filed with the Idaho Department of Water Resources, 4055 Government Way, Coeur d'Alene, Idaho 83814.

Dear Mr. Quant:

We have taken the liberty of typing your Claim to a Water Right for your convenience, and we are returning it for your review and signature. We are also returning your Check No. 92-142 in the amount of \$10.

We noticed that under Item 6 on the Claim form that you had listed the place of use for the water as the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 26; however, according to your map, it is in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 26. In order to have a more valid Claim, this should be as accurate as possible; therefore, please list the correct location under Item 6.

After reviewing all items on the Claim, please have your signature notarized and return the form to our office along with the \$10 filing fee.

If there are any questions in this matter, feel free to contact us.

Very truly yours,

ROBERT G. HAYNES, P.E.

Idaho Dept. of Water Resources
1041 Blue Lakes Blvd. North
Twin Falls, Idaho 83301

Western District
Idaho Dept. of Water Resources
Statehouse - Annex 2
Boise, Idaho 83707

Checks should be made payable to the Idaho Department of Water Resources.

10. The remarks section should contain any pertinent information that you believe might be helpful to the Department of Water Resources including a general description of the contemplated development. Such information as the treatment to be given industrial waste which will be returned to streams, name and address of well driller and nature and content of industrial effluent may be included.
11. The map must include information as to the location of proposed reservoirs, dams, canals, ditches, pipelines, wells and other works proposed to be used in the diversion of the water. The map must also clearly show the location of the lands to be irrigated or the place of use and the point of diversion. The map must be complete as to the Public Land Survey and legal descriptions.

NOTE: At the scale of 2 inches equalling one mile, each small square would be equal to a 40 acre subdivision.

Be sure to sign the application in the exact manner it is shown in item #1 and include the proper fees. Idaho law specifically prohibits the Department from officially receiving any application which is not complete or which does not have the proper fees included.

If the application is in more than one name, each person named must sign the application unless the other submits a power of attorney for those not signing.

If the applicant is a corporation or municipality, the person signing the application must be an officer or elected official of that corporation.

In any case where someone other than the applicant or a company officer signs the application, evidence must be included with the application that the person signing is acting as and holds a current "Power of Attorney" authorizing the action. (Forms are available for this purpose from the Department upon request.)

Appropriation of Water Involving Exchanges with Other Water Rights

If you are appropriating water by exchanging water with another user, you must fully identify, if possible, the water right held by the person with whom you are exchanging and the method by which you will exchange the water, listing all points of exchange, return and re-diversion. This may be listed under item #3 or under "Remarks." If you are directly exchanging water into the facilities of another and directly exchanging with his water right, you must provide with your application an agreement signed by both parties.

Approval of your Application

Processing of an application usually takes from 6 to 8 weeks. You will be notified of any protests received or will receive a copy of the approved application. You should be aware that all approved permits, except those for small amounts of water, will carry the requirement that the applicant permanently install and maintain a measuring device of a type approved by the Department as part of the diverting works. The Department may refuse to issue a license if this condition is not fulfilled, and no water right could be established.

Values

One cubic foot per second (c.f.s.) = 448.8 gallons per minute (approximately 450 gallons per minute) or 50 miners inches. (Idaho)

One cubic foot per second flowing 24 hours = 1.9835 acre-foot (approximately 2.0 acre-feet.)

Acre-feet: The volume necessary to cover one acre to a depth of one foot (43,560 cubic feet.)

Miners inch: A continuous flow equal to 1/50 cubic feet per second.

6. a. Describe the complete development, giving pump, motor, ditch, pipeline or structural sizes, if known.
- b. If you are applying to impound water, complete this item.
- c. Complete this item if development involves a well.
7. a. Give the time required for the completion of the work and application of water to the proposed use. The maximum amount of time for which a permit may be issued is five (5) years.
- b. Give an estimate of the total cost of construction of your system.

8. Describe proposed uses:

a. NON-IRRIGATION USES

- (1) List the area that water is used, described by the Public Land Survey System, listing each 40 acre subdivision, Section, Township and Range.

NOTE: Lengthy land lists may be entered under the remarks section of the application for permit.

- (2) If applying for power production, include an affidavit of residence within the State of Idaho. (Forms for this purpose are available from the Department upon request.)
- (3) If stockwatering has been listed under item 4, state the total number of each type of livestock for which you intend to obtain a water right. List the maximum number of each type for any one year.
Example: 500 beef cattle, 25 dairy cattle, and 5 horses, etc.
- (4) If municipal water was listed under item #4, state the name of the municipality served, and enter the number of people served in the "Remarks" Section. If domestic is listed under item #4, state the maximum number of families to be served.
- (5) Describe any other uses not fully explained above.
Example: If for industrial, fish culture, etc., give details to support the amount of water requested.

b. IRRIGATION USE

List all lands to be covered by water produced pursuant to this application. Insert townships, ranges, sections and number of acres irrigated in each 40 acre tract.

Example:

Twp.	Rge	Sec	NE 1/4		NW 1/4		SW 1/4		SE 1/4		TOTALS					
			NE	NW	SW	SE	NE	NW	SW	SE		NE	NW	SW	SE	
9 S	54 E	21	40		4	4				4			40	40		172

- c. Describe the ~~nature~~, source, priority, amount and type of all other water rights held by the applicant for the same purposes on the same place of use. Include decrees, licensed permits, permit and use rights by identification number.
9. a.&b. Give the name of the present owner, even if a purchase contract or lease is in effect.
- c. Explain the contract, lease, desert land entry, or other arrangement by which land other than the applicant's is proposed to be developed. If any federal grounds are involved in the development, include with your application evidence that you have received a right-of-way or special use permit from the Federal Government allowing you to use those lands. If you are developing water from a lake of less than 5 acres in surface area, or a spring wholly contained and not flowing off another individual's lands, you must submit evidence of permission from that individual to file on the lake or spring.

In this the right permit I would need to secure water rights on our 80 acres in Naples, Idaho. The Creek is Dodge Creek which is at one corner of our property. Thank you.

INSTRUCTIONS FOR FILING AN APPLICATION FOR PERMIT

MAY 27 1975

Under present Idaho law, the only method of developing a right to use water is by applying for and receiving a permit from the Department of Water Resources. Wells used for domestic purposes are exempt from this requirement, but it is advisable to obtain a permit for domestic purposes. The law also requires that an application for permit be submitted to the Department before the well is drilled or surface water diversion works are constructed.

The "Application for Permit" form should be used when you wish to establish a new water right. You should file an application before any development is begun. The priority of the right will date from the time that the application was received by the Department, provided you meet all the requirements of the permit.

If you have a water development that has already been completed and in use for a period of time, you may have already established a water right which will have a priority dating back to the first time of use. In these cases, you might not want to file the "Application for Permit" form and might wish to consider filing a "Claim to a Water Right" form. Claim forms are available from the Department of Water Resources. These forms cannot be used for wells drilled after March 25, 1963 or for surface water developments after May 20, 1971.

COMPLETE THE APPLICATION FORM AS FOLLOWS:

1. Give the full name, mailing address and telephone number of the applicant.
Bruce Quant Naples, Idaho 83847 Star 86
2. Give the source of water supply and the major stream to which it is a tributary.
Examples: *Dodge Creek* *Deep Creek*
Source of water supply Trail Creek which is tributary to Snake River.
Source of water supply unnamed stream which is tributary to Grimes Creek.
Source of water supply ground water Which is tributary to _____.
3. a. Give the location of the points of diversion by describing them by 40 acre subdivisions or U. S. Government Lot, of the Public Land Survey System.
Examples:
Location of the point of diversion is NE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec. 6,
T. 6 N, R. 3 W, B.M.
Location of the point of diversion is Lot 1 of _____ of Sec. 6,
T. 5 N, R. 24 E, B.M.
b. Give the location of the point at which your return flow water will enter a stream or water course, if any.
4. Give the rate of diversion or the amount of storage to be used for each purpose described. Describe the purpose for which you intend to use the water and give the period of the year during which you intend to divert water for this purpose. The amount you describe for each purpose should be the maximum rate for that purpose only.
Examples:
Amount 6.4 for irrigation purposes from Apr. 1 to Oct. 15 (both dates inclusive) (c.f.s. or acre feet per annum)
Amount 100 for irrigation purposes from Apr. 1 to Oct. 15 (both dates inclusive) (c.f.s. or acre feet per annum)
Amount 0.02 for domestic purposes from Jan. 1 to Dec. 31 (both dates inclusive) (c.f.s. or acre feet per annum)
5. a. State the maximum rate of diversion at any one time which you propose under this application. The amount entered under item #5 may be less than the total of line items #4; however, it must be at least equal to the largest line item under #4.
Example: 6.4 cubic feet per second
b. If your proposal under this application includes impoundment of water, or if the total acre feet to be used by direct diversion is known, state the maximum acre feet requirement per year.
Example: 100 acre feet per annum

NOTE: Every impoundment application must include a maximum rate of diversion, as well as the total storage.
