Dear Mr. and Mrs. Kask:

The Department of Water Administration has completed the processing of your claims to a water right, and no further action is authorized under Section 42-225a and 42-225b, Idaho Code. Your claims will be retained in our files and will be available at any time for use by you or the court.

As you are aware, the filing of a claim does not, in itself, guarantee you a water right; it only records and preserves the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included in your claim files, you may have that information or evidence added at any time. Please refer to your claim numbers when corresponding with this office.

We are enclosing, for your records, copies of your claims. If you have any questions, or if we may be of any further assistance, feel free to contact us.

Very truly yours,

FRED EISENBARTH

Mrs. Arnold Kask
Star Route 2
Bonners Ferry, ID 83805

Dear Mrs. Kask:

The best manner in which to describe and explain the situation concerning your shallow well is to enter your letter of February 12, 1974 in your claim files. This will verify that the well has a direct relationship with Round Prairie Creek and should be considered as the same source as the creek.

If you believe it should be explained further, you may write another letter describing the situation in more detail and we will include that letter as additional evidence in your claim files.

The main objective is to let it be known that your well is directly related to Round Prairie Creek and that when water rights are to be determined from the creek, your well should be included. By our correspondence in your files, this objective will be reached.

If you should have any other questions, or if we may be of any further assistance, please contact us.

Very truly yours,

Re: Claims #
98-4037 / 98-4038

Dear Mr. Eisenbath,

After speaking with our neighbor, John Texas about our respective water claims, which terms were expressed differently in the public notice, although our situation is identical, I decided to write for clarification.

John's claim asks for water use directly from the Round Prairie Creek, although ~~use~~ is via his well, approximately 20' deep. Our claim to domestic and irrigation, also, is expressed as directly from each of 2 wells, both of which are less than 20'.

Is it to be assumed by all that the source of water feeding the wells is Round Prairie Creek because the

98 4037

* Wells are shallow? Or does it mean that we "goofed" in following instructions and are not actually claiming water from the Truly only reliable source, the Creek?

John says a special notation was entered on his claim which assures him of creek water, whereas, the well source is not reliable when and if the water table drops.

If there is an error concerning meaning and intent on our claim, it is best that we correct it now. May I ask, then, that you clarify and instruct us in this matter?

Also, may I convey my apologies for causing so much correspondence in our stead.

Sincerely,

Mrs. Arnold Lark

Dear Mr. Kask:

We regret that we must return your well-prepared claim, for the reason that we can only accept one source of water per claim. You should transfer the information to separate forms--one for the creek and one for the wells.

There is a filing fee of \$10 for each claim, which should be submitted along with the forms.

Department of Water Administration

Dear sir,

In submitting our claim to a water right, we found some difficulty in supplying answers to the required information, answers that describe our situation correctly. The following is additional, simplified information which might make our claim more comprehensible.

1. Property: 5 acres, including a part of Round Prairie creek, in Boundary County, located at SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sect. 21, T65N, R2E, B.M. along State highway #95.
2. In seeking your kind approval of our claim, a total amount of 0.05 cubic feet per second, we shall mention that this request is based on our three needs for water; irrigation, domestic, and pond.
3. We have two shallow wells and two pumps.
 - a. For irrigation purposes (designated in question 4b as b1)
 - b. For domestic use (designated in question 4b as b2)
4. Pond: fed through a 4" diameter, concrete pipe and a small ditch from the creek. (designated on the list as 3)
5. Property includes 2 houses (separate housekeeping)
6. Wells, pumps and pond have been in existence and use since, at least, 1960 to the present time, although there have been different owners during that span of time.
7. No new uses for water are being requested.
8. There is no dam on the creek at diversion point, or elsewhere.
9. Water diverted into pond is returned to creek without contamination. Pond is used only for fire protection.

We trust this will further clarify our situation.

Sincerely,

Arnold Kask
