Dear Sir:

Enclosed find my check for \$5.00 as requested by your letter.

I notice that you have reduced the amount of water diverted to 0.02 c.f.s. from the amount I originally requested. As I pointed out in my original application, the system was assigned to handle the water requirements for two separate residence premises. One of the residences to be served has not yet been built. After discussing this with your representative who was here, I am of the opinion that when we wish to add the second residence to the system, all we will have to do is request you to increase the permit to 0.04 c.f.s. and this will be granted. Is this correct?

Gentlemen:

In a letter from your office dated August 25th, 1966 and signed by M. Russell Bosch, I was advised that your engineer would make a field examination of the private water system involved, and that I would be contacted when he was ready to make the examination.

To date I have heard nothing further about this from your office.

Since use of the system is seasonal and the system will be drained before freezing weather sets in, I suggest that the inspection be made as soon as possible, if it is to be made this year.

Please advise.
