Re: 98-2017

Dear Ms. Fallquist and Ms. Searce:

To verify ownership of License No. 98-2017 (formerly License No. 13222) you should send a copy of the deed to this Department.

As far as a one-half interest in water for a single household is concerned, it is not possible to split this portion of the right. Two homes constitutes an enlargement or a change in the nature of use, and as such, required a new filing.

Since the license does not separate irrigation use from domestic use, you may use 0.04 cfs for domestic purposes for a single household and 0.50 cfs for irrigation so long as the combined use does not exceed 0.50 cfs. The irrigation can only be used for 7 acres within the NWNE, Sec. 12 and 18 acres within the SWNE, Sec. 12.

If you have any other questions, please do not hesitate to contact me at this office.

Sincerely,

TOM D. KING

Dear Mr. Wickstrom:

After receipt of your letter of October 5th enclosing a letter from C. B. Williams, Chief Engineer of the Spokane International Railroad Company stating the land as being in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 12, Township 61 North, Range 1 West, we have made further search for a water right and find that a License for a water right of 0.5 cubic feet per second or 25 Miners Inches was issued to Dan Lynch, with priority of March 2, 1920. Said License states that the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 12, Township 61 North, Range 1 West, is entitled to 7 Miners Inches or .14 cubic foot per second of waters of Caribou Creek.

Thinking perhaps that you should have a copy of said License, we have taken the liberty of making up a photo-copy of the License on file in this department, which we are enclosing herewith.

If this License is of value to you, please remit to this department the sum of one dollar as cost of issuing a photo-copy of a Licensed water right.

Dear Mr. Wickstrom:

This will acknowledge your letter of September 27, 1957 in which you request the following information; "Is there a water right for the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 12, Township 61 North, Range 1 West, B. Our records do not disclose that there is a water right for this NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 12. If you would care to give us additional information in regard to this water right, such as, if it comes from a stream, and the name of what stream and so forth, or is it pumped from underground water or from some other water source.

If we had all the details in connection with the water right, if it has ever been used on this place, we might look it up a little further and advise you.

Dear Mr. Wickstrom:

In reply to your letter of August 27, our records show that we sold the property we owned near our water tank at Deep Creek Siding to the Moravia Water System, Inc., a corporation. The land was described as the Northwest Quarter of the Northeast Quarter of Section 12, T. 61 N., R. 1 W.B.M. No mention was made of any water rights, and I don't know just what water rights we had. We drew water from the Caribou Creek for the water tank.

One of our maps shows that we had a water right, but I can't find anything further on this. Perhaps you could find out from the State of Idaho about this water right.

Yours very truly,

Chief Engineer

Dear Mr. Wickstrom:

In reply to your letter of July 27, 1957 in which you require additional information relative to the amount of water which you may file on from Caribou Creek in addition to what you now have, for License 13222 and License 19012. You request to know how much additional water you can file on from Caribou Creek.

For domestic and livestock watering, we wish to state that License Rights 13222 and 19012 includes domestic and livestock watering. However, you may file for irrigation purposes on additional un-appropriated water that may be in Caribou Creek up to the amount of one inch per acre, excluding the amount of water that you now have licensed water rights for.

We are enclosing an application for filing on additional water, which you may fill out and return to this Department, providing you wish to file on additional water for irrigation purposes.

Dear Sir;

Your letter of May 18th 1957 stated that two Licensed water rights numbers 13222 and 19012 are now in effect on this property located in Section 12, Township 61 North, Range 1 West, B.M.

I would like to know if it would be possible for me to secure an another water right to be used as a two way deal as an over head sprinkling system from an under ground pipe line which would be used for domestic and livestock watering. If so what amount of water could I take from Caribou Creek in addition to what I have already water rights for?

An early reply would be appreciated.

Dear Mr. Wickstrom:

This acknowledges your letter of May 18, 1957, in which you ask about water rights appurtenant to land in Section 12, Township 61 North, Range 1 West, B.M.

This will inform you that we have no record of any water right from Peel Creek. We do have rights recorded from Caribou Creek which are as follows:

Licensed Water Right No. 13222, in the name of Dan Lynch, for twenty-five miner's inches of water, with priority of March 2, 1920, to be used on the $W\frac{1}{2}NE\frac{1}{4}$ of Section 12, Township 61 North, Range 1 West, B.M.

Licensed Water Right No. 19012, in the name of Joseph D. Brooks, for seven miner's inches, with priority of July 15, 1940, to be used on the $SE\frac{1}{4}NW\frac{1}{4}$ of Section 12, Township 61 North, Range 1 West, B.M.

If you should wish to file on more water for use on your property, we have enclosed "Application for Permit to Appropriate the Public Waters of the State of Idaho" together with a pamphlet which gives the regulations and instructions in regard to filing for same.

When this application is approved it will be signed by the proper State Officials and returned to you as a "Use Permit" under which you may proceed with the construction of the work as described in the application.

To complete your water right two proofs are required as follows:

13222

Mr. R. C. Wickstrom

-2-

May 29, 1957

First: Proof of Completion of Works which is to be made by an affidavit and signed before a notary public. The time required to complete the works and make the proof should be stated under question (12) of the application.

Second: Final proof is made when the water has been applied to beneficial use (irrigation or whatever purpose it is intended). Notice of this proof must be published once a week for four consecutive weeks in the County Newspaper, at your expense. At the time set for the proof, depositions of proof of beneficial use by you (Deposition of Holder) and two disinterested witnesses (Deposition of Witness) must be made. The time, in addition to the time set forth for the completion of works, should be stated under question (13) of the application.

Dear Sir:-

We are in receipt of your letter of August 2nd, in regard to License No. 13222 for 0.5 second foot of the waters of Caribou Creek, issued to Daniel Lynch and recorded in Book 6 of Licenses at Page 3315, for the irrigation of twenty-five (25) acres of land in the ~~W¹NE¹~~ Section 12, Township 61 North, Range 1 West, B.M.

Inasmuch as this water is appurtenant to the land, if the instrument giving you title to the land above described has been recorded in the office of the Recorder of Boundary County, Idaho, it will not be necessary to record same in this department.

If, however, it is your desire to have the records of this office show the license in your own name, you may send us a certified copy of the decree or other instrument conveying it to you, and we will record same.

Re: Permit No. 13222. - Dan Lynch.

Mr. J. H. Cave,
Bonners Ferry, Idaho.

Dear Sir:-

Replying to your letter of the 23rd inst. would say that the reason the application blank for extension of time was enclosed in our letter to Mr. Lynch was because a sworn affidavit setting forth the reasons for an extension is required to be on file here. If it had not been necessary for the application to be filled out, the blank would not have been enclosed. However, in view of the fact that the holder of the permit has acted in good faith and has used the water, the application will be accepted at this time, if the enclosed form is filled out in the regular order and sent in as soon as possible.

Dear Sir:

Referring to matters relative to Water Permit No. 13222

issued to Mr. Dan Lynch of Moravia, Idaho, I wish to state that Mr. Lynch recently asked me to straighten out his water right affair.

After examining the papers sent to Mr. Lynch from your office and after questioning Mr. Lynch, I am satisfied that he understands your letter of Oct. 13th. 1921, which states that, one years extension of time may be granted, actually constitutes an extension of one year. The application blank sent from your office was not filled out and was not filed.

Mr. Lynch, a year or more ago, opened a ditch from a point approximately the same as described in the above Permit to the land therein described and he has been using the water for irrigation and domestic purposes for at least one year.

Will you kindly advise me as to what will be required of Mr. Lynch to secure his water right?

Respectfully Yours,

PROOF OF COMPLETION OF WORKS

Boise, Idaho,

Mr. Dan Lynch,
Dear Sir:— **Bonnere Ferry, Idaho.** **July 5, 1921.**

Under the terms of your permit No. **13222**.....you are required to complete your diversion works on or before **Oct. 13, 1921**. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
