RE: PERMIT NO. 97-07288

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

RE: Proposed Dam for water right 97-7288

Dear Mr. Valentine:

Your recent application for a water right to store water from Pee Wee creek tributary to West Branch Priest River, indicated that you planned to construct a dam with a height of 10 feet. All dams greater than or equal to 10 feet in height or storing 50 acre-feet or more of water are regulated by the Department to insure that they are constructed and operated in a manner which assures public safety.

Enclosed is an application for the proposed small dam. Please fill out the application, sign and return with the appropriate fee of \$10, if the dam is to be greater than 10 feet high, when measured as shown on the second page of the application.

If you have any questions or if I can be of assistance please give me a call in Coeur d'Alene (phone 765-4639).

Sincerely

David D. LePard
