Dear Mr. Beardslee:

Thank you for your letter of 24 March 1993 in regard to the status of my water rights filing. This was the first confirmation I have had that my action for a water right license was fully completed and approved. I appreciate your prompt response very much.

I do not have a copy of the license, and would also appreciate your sending me one for my records. Perhaps it was not forwarded to me at my Kuwait address (above).

Thank you again, and I will look forward to receipt of the actual license.

RE: Status of water right filing.

Dear Sir:

This letter is in regard to your letter dated March 12, 1993 concerning the status of your water right filing.

Our computer records indicate that you have Water Right License Number 97-07270. The Statutory requirements for developing this water right have been met and no further action on your part is necessary.

I have enclosed a proof report of this filing. You should have received a copy of this License from our State Office in Boise the latter part of 1992. If you did not receive a copy of this License, please let me know and I will arrange for one to be sent to you.

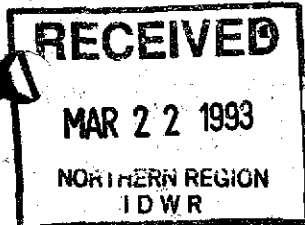

Also, Mr. King is now working on the Well Drilling Program here at the Northern Regional Office and I am currently handling the Water Rights Program, so future correspondence concerning water rights may be addressed to my attention.

If I can be of further assistance, please contact me at this office.

Sincerely,

ALLEN BEARDSLEE

Dear Tom,

I am writing to inquire about the status of my application for water rights.

I will be home from Kuwait for 3 weeks in June, and would like to finalize the permit. It has been at least 3 years, and I believe more if I check my files. I'm sure you can appreciate my concern.

Please don't tell me it is still on file and not yet signed!

If you can drop a quick note in the enclosed envelope, I would appreciate it greatly.

Thanks very much.

Best regards,

Dams on this system are primarily used for sediment settling basins. Dam #1 is an on stream rock and Concrete dam forming a sediment settling basin, with a screened four inch PVC pipe which allows the cleaner water to return to the open channel for about 20 feet, where the water is collected again by means of a second rock and concrete dam. This dam also forms a sediment settling basin, and is equipped with a four inch pipe which channels the water into a 12 foot long rock and concrete aqueduct which carries the water to the final dam. the water is then collected in a four inch gravity flow PVC pipe and delivered to a 1,000 gallon storage tank. Water is conveyed by means of a two inch gravity flow pipe from the storage tank, approximately 700 feet to project.

Dear Tom,

8 May 92

Hopefully you will remember me from your several trips to my place north of Priest River regarding ^{our} water rights application.

I'm back in the Middle East for a period - Kuwait this time, but will be home in early June, and would like to conclude action on the water rights license if possible.

Perhaps you could check on its status prior to my arrival, and I'll give you a call sometime after 7 June.

I don't happen to have my application number with me, but perhaps you can cross reference it with my name. Thanks for your help.

Best regards

Dear Mr. Ahrens:

I have enclosed a copy of your system diagram, as well as a copy of my field report calculations. Your diversion rate is based on either the amount of water your system can deliver or the amount that can be beneficially used for each purpose.

If you have any questions or if I can be of any assistance please feel free to contact me at this office.

PROOF DUE NOTICE

RE: PERMIT NO. 97-07270

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before November 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing N/A

10. Remarks This is an application to permit diversion of water from an unnamed creek for domestic, irrigation and stock watering purposes. The water will be diverted into a system as per the enclosed sketch, from an unnamed stream through a 4" diameter intake pvc pipe into a 1,000 gallon sistern with a 4" pvc overflow. From the sistern the water will pass through a 2" diameter pvc supply pipe running approximately 700', 6' underground, to the applicant's residence where the water will be used for domestic purposes and be routed from there for irrigation of approximately 10 acres and stock watering purposes. The point of diversion and the entire system is on property owned by the applicant. The anticipated cost of the system is the sum of about \$2,000. The entire system will be gravity flow and there will be no pumps utilized.
