CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 3.0 afa per acre for the lands above.

Dear Mr. Keyser:

Re: Permit No. 97-7194

The department received your proof of beneficial use form on July 15, 1987 and I have reviewed it.

For the record, please advise me of how large your lawn is in acre(s). Based on the amount of acreage, I can determine if a fee is required.

Originally, the permit was issued with irrigation of five acres as the intended use. If five acres of land is presently being irrigated than the diversion rate would be 0.10 cfs for which there is a fee of \$50 for the department to complete the field inspection. From the information on the proof form, however, it appears that less than 5 acres is being irrigated. If your water use is 0.04 cfs (approx. 18 gpm), then no fee is required for this department to do the field inspection.

Please advise me either by letter or phone call within 30 days. I will hold action on the proof form for that period of time.

Sincerely,

RITA I. FLECK

Dear Mr. Keyser:

Re: Permit No. 97-7194

The department received your proof of beneficial use form on July 15, 1987 and I have reviewed it.

For the record, please advise me of how large your lawn is in acre(s). Based on the amount of acreage, I can determine if a fee is required.

Originally, the permit was issued with irrigation of five acres as the intended use. If five acres of land is presently being irrigated than the diversion rate would be 0.10 cfs for which there is a fee of \$50 for the department to complete the field inspection. From the information on the proof form, however, it appears that less than 5 acres is being irrigated. If your water use is 0.04 cfs (approx. 18 gpm), then no fee is required for this department to do the field inspection.

Please advise me either by letter or phone call within 30 days. I will hold action on the proof form for that period of time.

Sincerely,

RITA I. FLECK
