CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for 1 home.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 14th day of MARCH, 1990.

=====

The Permit for this right lists "unnamed spring" as the source. However, under Proposed diverting works", Part 6a., a well and pump system is described. From correspondence in the file it is apparent that the applicant developed a "sandpoint" which has led to some confusion.

The examiner calls the source a "spring" but describes a 28' well. The license should be written for groundwater with no amendment necessary; the intent of the Permit is clear.

RE: 97-7127

Dear Mr. Burns:

We acknowledge receipt of your statement of completion of water development and use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We do not know at this time when he will be able to conduct the examination, however, the examiner will try to contact you at the time he makes the examination so that you may show him the system. If you will not be available to show the system, please provide this office with the name and address of someone who will be able to do so. Your permit will remain valid until the examination is made.

If you have any questions concerning the field examination, please contact this office. Please be sure to use the above-referenced permit number in in all future correspondence concerning this examination.

Very truly yours,

Re: Permit No. 97-7127

Dear Mr. Burns:

We are in receipt of your letter dated July 14, 1982. In your letter you have indicated that you are currently using water from a sandpoint and that you have no additional uses on your Priest River property.

The above referenced permit allows diversion of an unnamed spring for domestic and stockwater purposes. The permit, however, shows the proposed diverting works to be a well, pump and pipe line, and the map shows a house and a well. Therefore, it appears that the permit initially anticipated development of groundwater rather than a spring. You have indicated that you drove a sandpoint in 1976 and that the sandpoint furnishes your domestic water supply. If the intent of the permit was to develop the additional source, then please fill out the relinquishment form which you will find enclosed. If, on the other hand, the intent of the application was to record your sandpoint use then please notify this office of that fact by completing and returning the enclosed Statement of Beneficial Use white postcard.

If you have further questions concerning this right please feel free to contact this office or our Northern Regional office in Coeur d'Alene.

Sincerely,

Dear Sir;

I do not really know what we must do to hold the water rights for our place. We have 5 acres and have decided not to have any livestock. We have our own well just for house and garden, we don't expect to make any changes unless we have to drill a well - we have a sand point at present.

We have permit no. 97-7127 this was made Jan. 17, 1979 - We drane our sand point in 1976 and do not intend to have any more than a well for house & garden.

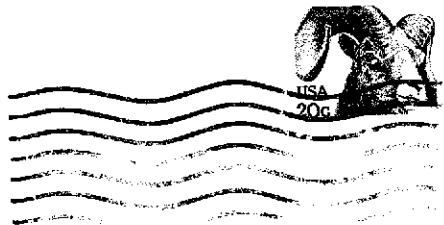

Please advise what is necessary for us to do now to protect this.
