WATER RIGHT LICENSE

License of Water Right No. 97-7013 Priority May 3, 1971 Amount 0.15 cfs

THIS IS TO CERTIFY, that Outlet Water Association
of Priest River, Idaho, has complied with the terms and conditions of Permit
No. 97-7013 issued pursuant to Application for Permit dated May 3, 1971,
and has submitted proof to the Department of Water Resources on June 24, 1981,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.15 cfs of water from a spring,
tributary to Lamb Creek, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Domestic	from <u>January 1</u> to <u>December 31</u>	at <u>0.15</u> cfs and	<u>58.1</u> acre feet
	from _____ to _____	at _____ cfs and	_____
	from _____ to _____	at _____ cfs and	_____

(both dates inclusive)

Subject, however, to the condition that no more than 0.15 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
58.1 acre feet per year, said waters to be diverted within the SW 1/4 SE 1/4 Section 31,
Twp 60N, Rge 4W in the County of Bonner

CONDITIONS OF APPROVAL

- a. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.
- b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.
- c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

Domestic use is for 46 homes and 31 unit camp.

Witness the seal and signature of the Director, affixed at Boise, Idaho, this 11TH day of June, 19 86.

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.

Dear Sir:

We would like to apply for an extension on our water permits. We have not completed our system, as yet, to meet your specifications. We have another pump and the meter gauge on order but, as yet, neither has arrived.

We, also, would like to up-date our system so that we could accomodate a few new customers. We are working on limited funds and volunteer help, along with the raising costs of every thing, so it is taking longer than we ever expected.

We would like to apply for years extension, if at all possible.

Thank you.

Outlet Water Association
Route # 5
Priest River, Idaho 83856

Gentlemen:

One of the conditions of approval of your water Permit No. 97-7013 & 97-7014 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before JULY 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

Enclosed are copies of your approved Application for Permit Nos. 97-7013 and 97-7014. We direct your attention to the conditions of approval as listed on the fourth page.

It should also be noted that since the point of diversion is on Forest Service property, you will have to negotiate for proper easements with the Forest Service. The state water permit does not authorize ingress or egress.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

Very truly yours,

Dear Mr. Gray:

We have received your recent letter concerning the applications of the Outlet Water Association. We are unable to consider your letter as a formal protest to the approval of a permit to appropriate water. According to Section 42-203 of the Idaho Code, we can consider only the following four (4) points of protest:

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculation purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

Your protest should state the manner in which the applications will cause injury to your existing water rights, if any. If you have valid grounds for protest under one of the four (4) points, we will allow you ten (10) days from the date of this letter in which to submit the protest.

If you have any questions in regard to this matter, please let us know.

Dear Sirs;

Re: Protests against
applications for
water permit

I should like to protest the granting of a permit to take water from a spring, tributary to Lamb Creek, as requested in Application No. 97-7013.

I Should, also, like to protest the granting of a permit to take water from Lamb Creek, as requested in Application No. 97-7014.

Reasons for my protesting both above-mentioned applications are stated in the following paragraphs.

(1) Conservation of our natural resources is very important. In order to conserve Lamb Creek as a fishing stream, it is essential to preserve the flow of water at its present level without further restriction or decline.

(2) Water rights, already granted, have a serious effect upon Lamb Creek during those seasons when the snowfall is minimal or has little moisture content.

(3) I purchased the property on Lamb Creek because of its flow, seclusion and potential for fishing. A reduction of the water flow in the creek could conceivably cause property values to depreciate.

Sincerely,

It would seem advisable for the Outlet Water Association to obtain their domestic water supply directly from Priest Lake, which, because of its size and depth, has less opportunity for contamination than do the surface waters of Lamb Creek.

Gentlemen:

This is to protest
applications no. 97-7013 and
no. 97-7014 requesting a permit
to take water from Lamb
Creek and from a tributary
spring to that creek.

Personally I am inter-
ested because I have
purchased property near
the mouth of this creek
- I do not know what the
effect would be on lowering
the water level in this
area but I do know
that a large sum of
money was spent on
dredging to deepen it so
that now boat docking is

possible in this area!

As a conservationist
- being an associate
member of the Federation
of Western Outdoor Clubs,
I feel that lowering
the level of water
flow of this small
stream could ruin its
fishing potential. In
years when it is too
low to fish, except in the
deep holes, many
children fish here. It
is a good father and
son stream. Lets keep
it that way!

Thank you for your
consideration of this
protest.

Sincerely,
Mrs. Myrtle Pryor

Gentlemen:

I have received the application of the Outlet Water Association, Priest River, Idaho, for 0.15 CFS for domestic water for the Outlet Water Association.

The Outlet Water Association did construct intakes into a spring in Lamb Creek and apparently wish to enlarge their intake area. This is satisfactory to this office.
