MEMORANDUM

Re: R-733

April 18, 1968

Examination of this permit shows that proof of completion of works and application of water to beneficial use is not required. Therefore action on this storage filing may be considered completed, the same as if proofs had been submitted and license issued. Although the status of this permit may be questionable, no further action will be required until adjudication.

Re: Idaho Water Right License Nos. 97-2030, 97-2031, 97-2056,
97-2058, 97-2060, 97-2061, 97-2062 and 97-2063

Gentlemen:

On April 26, 1985, the Idaho Water Resource Board filed an Application for Permit to develop a minimum instream flow water right on Indian Creek tributary to Priest Lake in Idaho. In the course of investigation of water rights related to Indian Creek, we have discovered the eight above-referenced licenses in the name of the Diamond Match Co. The purpose of this letter is to solicit information regarding the currency and validity of the licensed water rights.

For your information, we have enclosed copies of each of the licenses, and a copy of a map of the "Indian Creek Logging Flume," which was prepared in 1951. At the time of our field examination, which was conducted in 1951, the logging flume was functioning for the purpose of conveying logs to the match factory located along the banks of Priest Lake.

It is our understanding that this logging flume and the associated match factory have not been in existence for many years. Pursuant to Section 42-222, Idaho Code, a copy of which is enclosed, "All rights to the use of water acquired under this chapter or otherwise shall be lost and forfeited by a failure for a term of five (5) years to apply it to the beneficial use for which it was appropriated and when any right to the use of water shall be lost through nonuse or forfeiture such rights to such water shall revert to the State and be again subject to appropriation under this chapter." Based on this statute, it appears likely that the above-referenced licensed water rights have been forfeited.

For the purpose of clarifying the record on this matter, we ask that you provide information regarding when the match factory along Priest Lake last utilized the Indian Creek logging flume. Based on information that you provide, the file can be better documented regarding the availability of flows for instream flow purposes. I would ask that you please provide this information to my attention by June 1, 1985, so that we may proceed in a timely manner with processing the minimum stream flow application.
