Dear Mr. Hamacher:

Our field examiner's report on his inspection of proof of beneficial use under Permit 25598 shows the pump and pipeline are capable of conveying 20½ miner's inches or 0.41 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$4.00, we will issue the license and certificate of water right for 0.41 c.f.s. confirming the right, with priority of April 12, 1954, to the use of surface water from Pend Oreille River with the point of diversion in Lot 4, Sec. 13, T. 56 N, R. 6 W, B.M. for irrigation of 23 acres in Lots 3 and 4, Sec. 13, T. 56 N, R. 6 W, B.M.

Dear Mr. Hamacher:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Priest River Times, all submitted in proof of completion of works and beneficial use on Permit No. 25598.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

DEPARTMENT OF RECLAMATION

Re: Permit No. 25598

Date:

Feb. 1, 1966

Carl J. Hamacher
Route #4
Newport, Wash.

Dear Mr. Hamacher:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 25598 is due not later than **April 19, 1966**. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated -- by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

CARL E. TAPPAN

Dear Mr. Hamacher:

Returned herewith is the Proof of Completion of Works
you submitted to this office.

Under "Eighth" you show SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 13, T. 56 N., R. 6 W.,
your Permit shows that the 23 acres are in the S $\frac{1}{4}$ SW $\frac{1}{4}$, and NW $\frac{1}{4}$ SE $\frac{1}{4}$,
of said Section 13. You should show all the 40-acre subdivisions
that you are irrigating even if there is only a small amount of
land in each subdivision. If your irrigation is confined to only
the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of said Section 13, your answer is correct.

Kindly return the form after you are sure it is correct
and don't forget to enclose the \$5.00 fee for the Certificate of
Completion of Works.

Dear Sir:

Under the terms of your permit No. G-25598 you are required to complete your diversion works on or before April 19, 1960. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion of Works will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
