Dear Madam:

Under date of July 6th, Mr. Guy C. McGee, representing the State Department of Reclamation, made an examination of the works constructed under your permit and with reference to the amount of water applied to beneficial use and the place of such usage. Mr. McGee's report shows that you have irrigated 28 acres with the water claimed under this permit, which would entitle you to a license for .56 of one second foot of water. However, at the time when you offered proof of completion of works, your works had been completed to a capacity of .4 of one second foot and since in no instance can a license be issued for more water than the certificate of completion of works covers, your license must be limited to this amount.

There is a fee due of \$2.00. Upon receipt of this amount we will issue the license.

Dear Bob;--

I am inclosing herewith 5 Permits that have been examined.

You will please note that in the Permit of Mrs. Kreszenz Kramer Permit No.16769 that the source of water supply as shown was from Priest River and is actually from an unnamed stream some two miles from the River.

Also please note that in Permit 17566 of R.H.Brownfield that the point of diversion is not properly described. This may be merely a transposition of letters in the description. I made a careful check on this and the point of diversion is as shown on the map accompanying the application.

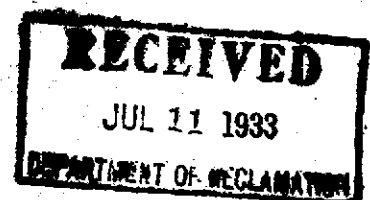

The remainder of the inclosed Permits are O.K.

I am leaving in the morning for Wallace, Kellog and Pocatello and will return the completed reports on these Permits within a few days.

Sincerely

REPORT OF ENGINEER

Permit No. 16769

This proof is for Beneficial use

In Water District No.

1. Name of applicant Mrs. KRESZENZ KRAMER
2. Source of water supply: Spring
3. Location of point of diversion: Is in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 27
T. 56 N. R. 4 W. B. M. County of Bonner
4. Describe works as they exist, giving dimensions and capacities of same: Work consists of a rock dam 2 feet high and 8 feet long diverting water in one ditch 1 foot wide and 1 foot deep with grade of .5 per 100 feet. At the time of inspection carrying .5 ft. of water. Capacity of this ditch is .75 Cu.Ft. per Sec. This main ditch can be diverted to either the east or west ditch that carries the water to the land to be irrigated.
5. Water is used for: Irrigation and domestic purposes.
6. State whether or not water has been turned into works of diversion: Water has been used in this system for three years.
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation):
NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 27, Twp. 56 N., R. 4 W. B. M.
28 acres in cultivation in this tract.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Priest River.

Remarks:

This irrigation system is well constructed and fully ample to irrigate the land available. The water returns to the same stream from which it is diverted. This water supply is from an unnamed Stream and not from Priest River.

This examination was made on the 6th. day of July, 1933.

Dear Madam:

Under date of August 16, 1932, we wrote to you regarding your proof of COMPLETION OF WORKS and also your BENEFICIAL USE proof under the above mentioned permit. However, you did not answer all the questions, and therefore we are again bringing this matter to your attention at this time.

In answering paragraph 5 on the affidavit you did not mention irrigation, but under paragraph 8 you gave the description of 40 acres. At the time your permit was issued you gave the purpose of the appropriation as irrigation and domestic, consequently we are unable to determine from your affidavit whether you desire the water for irrigation and domestic purposes, or for domestic use only.

After your affidavit has been received, we will fix the date on your notice for publication relative to BENEFICIAL USE so that there will be sufficient time for the same. As both of your proofs are due on October 14 it is quite imperative that you make an early reply in this matter.

We will hold these papers until we hear from you further.

Re: Permit No. 16769

Mr. Kreszenz Kramer
Priest River, Idaho

Dear Sir:

We are in receipt of the affidavit of the holder for proof of COMPLETION OF WORKS, and also notice in duplicate for publication in the matter of BENEFICIAL USE proof under the above mentioned permit.

In checking over the affidavit we note that you are offering proof of COMPLETION OF WORKS on only .5 of one cubic foot per second, which is to be developed from the spring designated on your permit as No. 1. It is evident that you have not developed spring No. 2. Under paragraph 8 in the affidavit you have made a statement to the effect that the water is available for 40 acres, but you did not give the description of the said 40 acres. If it is true that you have appropriated the water from only the one spring, then your quantity must be limited to .4 of one cubic foot per second since that is all that was claimed under spring No. 1 at the time when your permit was issued.

It is quite apparent that the 40 acre subdivision which you propose to irrigate is either the NW¹/₄NE¹/₄ or the NE¹/₄NW¹/₄ of section 27, Twp. 58 N., R. 4 W.B.M.; or possibly you propose to irrigate some land in each of the above 40's. Please indicate on the affidavit which of the above is correct.

With reference to your notice for publication, it is suggested that you change the date on which proof was to have been submitted from August 12 to September 12 so that there will be ample time to complete the publication. This publication must be made once a week for four successive weeks.

Very truly yours,

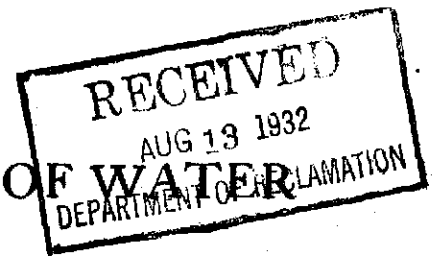

R. T. FARIS

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mrs. KRES ZENZ KRAMER
Priest River, Idaho

Boise, Idaho,

August 5, 1932

Dear Sir:—

Under the terms of your permit No. **16769** you are required to complete your diversion works on or before **Oct. 14, 1932**. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

R. W. FARIS
