

RENDEZVOUS ENGINEERING, P.C.

Civil Engineers and Planners in Wyoming and Idaho

Rendezvous Project No: 05-003

**Dave Carlson
Senior Water Resources Agent
Idaho Dept. of Water Resources
900 North Skyline Drive, Ste. E
Idaho Falls, ID 83402-1718**

10/18/06

Dear Mr. Carlson:

Enclosed is the application for a permit to appropriate public waters of the State of Idaho to serve the needs of River Rim Ranch, Division II Phase 1 public water system. As stated in the permit, the water shall be used only for the interior uses of the residential lots, and minor supporting commercial facilities. All irrigation and fire protection for these units shall be provided from a separate system that will make use of other water rights. Accompanying the application is the required fee (\$250), a map showing the location of the diversion wells and area of use in relation to section corners in T6N R44E, and a unit count for the residential units that is excerpted from the final plat application (final plat has been approved and recorded in Teton County).

A key component of the overall design of River Rim Ranch, Division II Phase 1 is a common wastewater collection, treatment, and disposal system that will return treated wastewater to the groundwater system through a Large Scale Adsorption System. This will minimize the consumptive use, and any adverse affect to down-gradient users.

If you have any questions or concerns, please contact us at your soonest convenience, as we are eager to assist an any way possible.

Sincerely,

**Rendezvous Engineering
Bob Ablondi, P.E. #5994**
