RE: App For Transfer 70893

Dear Bob;

We are still holding your proposed transfer for design data on your proposed ponds. As I previously stated, we need to know the depth and surface area of all proposed ponds, and the length and width of any new ditches that will be built between the existing conveyance works and the Snake River. This information will be used to calculate any additional consumptive losses that may occur due to your project. Do you plan to line the ponds to prevent seepage?

Please provide the required information by March 11 so that processing of your transfer can continue. If you need more time, it can be granted for sufficient cause upon receipt of a written request.

Regards,

James E. Stanton
Sr. Water Resource Agent
