Re: Application for transfer – G&G Dairy & Idaho Water Co.
Project No. 841-01-2005

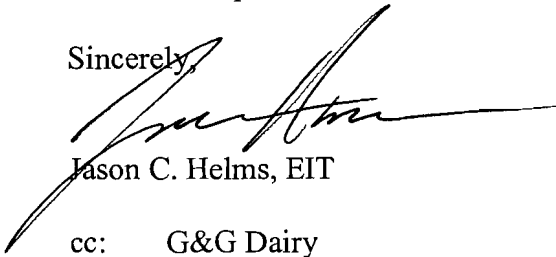

Dear Allen:

Enclosed are two applications for transfer prepared on behalf of G&G Dairy & Idaho Water Co. G&G dairy seeks to provide additional stockwater from Idaho Water Co. Right 36-7378 for use in an existing dairy facility. The Idaho Water Co. transfer seeks to create a permissible place of use for existing water rights at what was the Phillips farm, while moving in an additional 5.3 acres.

The ESPA mitigation analysis was performed as a combined transfer which shows that no mitigation is required in order to maintain additional Snake River reach depletions below 5%.

I have attached several agreements between the clients and all associated water rights which should demonstrate proper authority for their respective transfers. Finally, I have attached Brockway Engineering Check # _____ for \$500.00 which should cover the applicable transfer fees associated with the two transfers (\$250.00 * 2). If you have any questions or need additional information, please don't hesitate to ask.

Sincerely,

Jason C. Helms, EIT
