2) Amendment 63-12296

EMPLOYEE RZ

RE: AMENDED APPLICATIONS

Well #4B recently drilled as \$200 replacement well but now realize need it as additional P10. Completed to public water supply specs.

Well #6 drilled & deepened in 1970s but capped. Add it as possible irrigation well.

Transfer - add these 2 wells. Identify wells that can provide municipal (non-irrigation) water & which ones do not. Upon approval, assign muni wells as pld's for rights showing only muni. use. Assign all wells as pld's for rights showing only irrigation or showing irrigation in addition to muni. use (since muni wells can serve as back up to irrig. wells but not vice versa).

Amendment of Permit - show wells that meet public water supply specs since proposal use is municipal.

Wells meeting public ^{water} supply specs are # 3, 4, 4B, 7 & 8.

↳ the newest one

FEE - \$50 each to amend & re-evaluate each filing.

RE: Replacement Well

IDOC had replacement well drilled in SWSE 5.27, recently completed by Riverside Drilling (D0015464). New info shows need to keep the old well plus use the new one. Asked what WR steps are needed?

PER - RBW, new well completed to public water supply specs.

PER database, only 1 authorized P/D in SWSE 5.27: for old well #4 originally described in WR records 63-3487, 63-7025 & AT records 63-30297, 63-30298.

T. 5635 combines these rights & others into a common system. (Related Amendment 63-12296 does not involve 5.27 plds).

Discussed w/ Gary & Norm - i.d. wells for muni use (public water supply construction) vs. wells just for irrig. system. Amend transfer & amendment to add new muni well. RE-adv. w/o statewide notice (new well only contributes minor portion to Q --- not ≥ 10 cfs from new well).
