Appropriation Rule 40.05.c information: N/A

Mitigation Plan or acceptance form: N/A

Evidence of Pre-1987 development: N/A

6. jstanton 8/15/2006 Comment/Analysis

Comment: This application covers two new wells that the applicant wants to drill to provide water for heating the new Jerome Middle School that is being built on the property. The proposed use appears to be non-consumptive to the ESPA, as the water will remain in closed pipelines during use before being injected back into the ground via a separate well to be drilled just north of the production wells. The application appears to be exempt from the 1992 moratorium and therefore approvable with standard conditions.

7. jstanton 8/15/2006 Legal Notice Remarks

Comment: This application covers the drilling of two new production wells on the west

Comment: This application covers the drilling of two new production wells on the west side of the new Jerome Middle School. The wells will provide water for heating the school with non-geothermal water, which will be discharged back into the Eastern Snake Plain aquifer after use. The wells will be located about 3/4 miles north and 3/8 miles west of the Jerome city center.
