WA

Dear Jeff,

Thank you very much for helping us with our water rights questions. As you have suggested, I have completed the application for permit to appropriate water. Please find it, an attached map, and a check for the fees. Also, please review it and see if it needs any additions or corrections. The following are some items I had some questions about:

#3 – I did not know how to fill in the 'Govt. Lot' space.

#4 – The date? Would that be from now to perpetuity?

#5 – Is this the correct calculation?

#6 – Are any other answers necessary?

#7 – Is there a maximum # of years? Is this how long I have to develop a well? If so, I would like to keep that open as long as possible.

#12 – Under remarks– should something be indicated that the water rights were moved by Mr. Bartlett in 1988 and that if no water is made available for irrigation of the 4 acres, the ground will remain in weeds except for the ½ acre that is watered by the domestic well?

Thank you for your attention. Please go ahead and submit the application after your corrections if everything seems in order.

Thank you again for your help,

Michael W. Benedick, DDS
