State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 45-13412

Priority: 12/04/2001

Maximum Diversion Rate: 0.90 CFS

This is to certify, that CITY OF MURTAUGH
PO BOX 157
MURTAUGH ID 83344

has applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
MUNICIPAL	01/01 to 12/31	0.90 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER	L1 NW¼NW¼	Sec. 7, Twp 11S, Rge 20E, B.M.	TWIN FALLS County
GROUND WATER	L6 NW¼SW¼	Sec. 6, Twp 11S, Rge 20E, B.M.	TWIN FALLS County

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **February 1, 2004**.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
6. The daily diversion volume for non-domestic uses under this municipal right shall not exceed 2,500 gallons per use and the daily diversion volume for domestic uses under this right shall not exceed 13,000 gallons per dwelling in accordance with Section 42-111, Idaho Code.
7. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this right.
8. The right holder shall not provide water diverted under this right for the irrigation of land having appurtenant surface water rights as a primary source of irrigation water except when the surface water rights are not available for use. This condition applies to all land with appurtenant surface water rights, including land converted from irrigated agricultural use to other land uses but still requiring water to irrigate lawns and landscaping.
9. Rights 45-7202 and 45-13412 when combined shall not exceed a total diversion rate of 0.90 cfs.
10. Place of use is within service area of the City of Murtaugh municipal water supply.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 7th day of February, 2002.

City of Murtaugh
Water Right Application Information

December 2001

RECEIVED

DEC 07 2001

Department of Water Resources
Southern Region

The following information is being provided as part of the Water Right Application for the City of Murtaugh:

The City of Murtaugh currently has only one source of water from a single existing well to serve the municipal water system. The City is currently planning a second well such that the system will have two sources of water as required by the Department of Environmental Quality regulations.

The existing well is set up to provide 400 gpm. It is recommended that the second well source be sized to match the production of the existing well. The water right to the existing well is only 250 gpm, thus the City currently does not have adequate water rights to cover the existing well. The water right application for the new well is for the 400 gpm target production and will list the existing well as an additional point of diversion, thus bringing it into compliance also.

In addition to the residential and commercial connections to the water system, the City of Murtaugh also provides domestic water to the Murtaugh School District. As determined in the City of Murtaugh Water System Master Plan (dated January 1998) the 400 gpm water right at the new well will meet the current and projected 20 year needs for the City of Murtaugh. This is of course based on current water use and does not account for the possibility of any large commercial/industrial water users moving into the area.

RE: Permit No. 45-13412

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a 'Proof Due Notice' approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

MICROFILMED
FEB 25 2002

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

(To be used in connection with actions when a hearing was not held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of, or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMO

FROM: Allen Merritt 
TO: Permit No: 45-13412

DATE: January 30, 2002

In the Name of City of Murtaugh

SUBJECT: Review and Recommendation

This application is for municipal uses for the City of Murtaugh. The application is located in the ESPA Moratorium Area and was processed pursuant to the exceptions of the order allowing domestic type uses to be developed.

The application was advertised without protest.

Recommendation

I recommend the application be approved subject to the following conditions:

WATER RIGHT NO. 45 13412

- 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
- 022 The daily diversion volume for non-domestic uses under this municipal right shall not exceed 2,500 gallons per use and the daily diversion volume for domestic uses under this right shall not exceed 13,000 gallons per dwelling in accordance with Section 42-111, Idaho Code.
- 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- 075 Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this right.
- 102 The right holder shall not provide water diverted under this right for the irrigation of land having appurtenant surface water rights as a primary source of irrigation water except when the surface water rights are not available for use. This condition applies to all land with appurtenant surface water rights, including land converted from irrigated agricultural use to other land uses but still requiring water to irrigate lawns and landscaping.
- W60 Place of use is located within service area of City of Murtaugh.
- W31 This right when combined 45-7202 shall provide no more than 0.90 cfs at any one time.

City of Murtaugh Water Right Application Information

December 2001

RECEIVED**JAN 29 2002**Department of Water Resources
Southern Region

The following information is being provided as part of the Water Right Application for the City of Murtaugh:

The City of Murtaugh currently has only one source of water from a single existing well to serve the municipal water system. The City is currently planning a second well such that the system will have two sources of water as required by the Department of Environmental Quality regulations.

The existing well is set up to provide 400 gpm. It is recommended that the second well source be sized to match the production of the existing well. The water right to the existing well is only 250 gpm, thus the City currently does not have adequate water rights to cover the existing well. The water right application for the new well is for the 400 gpm target production and will list the existing well as an additional point of diversion, thus bringing it into compliance also.

In addition to the residential and commercial connections to the water system, the City of Murtaugh also provides domestic water to the Murtaugh School District. As determined in the City of Murtaugh Water System Master Plan (dated January 1998) the 400 gpm water right at the new well will meet the current and projected 20 year needs for the City of Murtaugh. This is of course based on current water use and does not account for the possibility of any large commercial/industrial water users moving into the area.

January 2002 Additional Information:

As a summary of the above information, the 400 gpm will meet the current and projected 20 year needs for the City of Murtaugh. The existing well has a capacity of 400 gpm and the new proposed well is also planned for 400 gpm. Having a second well will provide the City with a backup (secondary source) well for the total needed capacity.

The water right application was for 400 gpm to cover the new well and listed the existing well as a point of diversion in order to bring it into compliance also. The total production requirement of the City is for 400 gpm deliverable from either the new well, the existing well or a combination thereof. The 400 gpm water right is needed at the new well in order to drill and test it, but the total combined water right of the new and existing water rights need not exceed 400 gpm.

RE: Murtaugh Water System Master Plan - Grant funds

Department of Water Resources
Southern Region

Dear Mayor Hanson,

Enclosed is a check in the amount of \$6,075 payable to the City. This check is the Idaho Water Resource Board's grant commitment to assist the City with the preparation of the Water System Master Plan. The Board may also be able to assist the City with some of the needed projects identified in the Master Plan through low-interest construction loans. Please call me if you are interested in this financing option.

It was discovered during the course of this study that the City does not have water rights to cover the current level of use. I encourage you to contact the IDWR office in Twin Falls (736-3033) and take care of this matter.

Please call me if you have any questions.

Sincerely,

WATER SYSTEM MASTER PLAN
FOR THE
CITY OF MURTAUGH

JANUARY, 1998

Prepared With Funding Assistance By
The Idaho Water Resources Board

Prepared by

JUB ENGINEERS, Inc.
1800 Falls Ave., Suite 1
Twin Falls, Idaho 83301

Water Rights

The City of Murtaugh does not hold sufficient water rights with the State of Idaho for their current use. They hold water right No. 45-07202 which allows the total diversion of 0.560 cfs from groundwater for municipal use. 0.560 cfs equals 251.3 gallons per minute which is less than the 400 gpm pump capacity.

TIMES NEWS
PO BOX 548
TWIN FALLS ID 83303-0548

Gentlemen:

Enclosed you will find a legal notice which we wish to have published in your newspaper. We have inserted the required publication dates.

We have attempted to submit this legal as camera ready. Please call me at your earliest convenience and prior to your staff re-typing the legal if it does not meet your specifications so I can possibly make adjustments.

If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Very truly yours,

Mary Baldwin
Administrative Assistant

Enclosure

RE: Application for Permit No 45-13412

Dear Mr. Ahrens:

The Department of Water Resources acknowledges receipt of the water right application on behalf of the City of Murtaugh. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office has scheduled advertising the application in the **Times News** for 01/03 & 01/10/02. A period of ten days following the second publication will be allowed for the submittal of protests. **(January 22, 2002)**

If an application is protested the applicant will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If an application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify the applicant of the outcome of this review. If a permit is issued, the applicant will be sent a copy. A typical processing time for an un-protested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Mary A. Baldwin
Administrative Assistant
