Total Acres: 163

CONDITIONS OF APPROVAL

- Beginning on the date of approval of Transfer 71642, Right 37-7808 is limited to the following schedule of allowed diversion rate and volume. The diversion of water shall be evenly distributed throughout the authorized season of use, except that minor variations are allowed for seasonal fluctuations in water requirements.

 From year 2006 and beyond the right is limited to 1.76 cfs and 308.1 afa for the use of irrigation of 163 acres within the place of use described above in a single irrigation season. The un-diverted portion of the right is 1.50 cfs and 262.4 afa that is used to mitigate Transfer 71642.
- The model used to calculate depletion effects and mitigation for the Milner to King Hill reach may also show gains in other reaches of the Snake River. Such gains have not been quantified at this time. The right holder retains the right to seek quantification of such gains resulting from Transfer approval 71642. Protestants retain the right to object to the quantification of such gains. If such reach gains are quantified and acknowledged by the Department, credits for such gains shall be available for use only after the Department has implemented a system for administering such credits.
- Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.

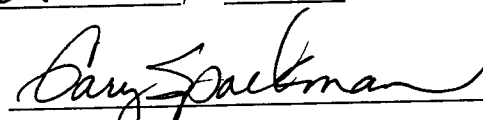

WATER RIGHT NO. 37-7808
As Modified by Transfer No. 71642

CONDITIONS OF APPROVAL

4. Prior to the diversion and use of water under Transfer approval 71642, the right holder shall install and maintain an acceptable measuring device, including data logger, at the authorized point of diversion and in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.
5. Prior to diversion and use of water under Transfer approval 71642, the right holder shall install and maintain an acceptable measuring device, including data logger, at the dedicated distribution lines to the authorized place of use for this right.
6. The right holder shall maintain a lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
8. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/15 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
9. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
10. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
11. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
