

MEMORANDUM

Date: September 11, 2006
To: Water Right File 37-8271
From: Shelley Keen *SWK*
Re: Licensing Recommendations

DIVERSION RATE -- Permit 37-8271 was issued for 3.0 cfs. The field examiner found the system capacity to be 3.0 cfs, and she recommended issuing a license for 3.0 cfs. However, she also stated that the point of diversion for this right is the same well that serves as a point of diversion for Right 37-7038. Actually, Right 37-7038 has two wells as points of diversion. They were measured at 2.0 cfs under artesian pressure in 1973, and Right 37-7038 was issued for 2.0 cfs. That leaves 1.0 cfs to be licensed under this right.

ANNUAL VOLUME -- The field examiner provided no information regarding the annual volume of use. I am recommending 724 AF based on continuous year-round use.
