Attn: Diane Ball:

This e-mail serves as the Idaho Department of Lands comments and response to the Port of Lewiston's Water Permit Application No. 86-11945 to add a point diversion on the Clearwater River. As the location of the Port's diversion falls within the "slack water" of Lower Granite Dam's reservoir, the Idaho Department defers regulatory responsibility for Navigable Waters to the Army Corps of Engineers.

The state appreciates the opportunity to comment on this and other water permits and joint applications for permit.
