Roger,

Water District #1 has never regulated any rights in Basin 24, yet. If sometime in the future Water District #1 would regulate small domestic surface rights, it should be realized that this new right's priority would only be filled for a few months (probably during March thru June) in "wet" years after the reservoirs have filled, and wouldn't be filled at all in "dry" years. However, the water district wouldn't have any objections to issuing this water right if that was understood by the applicants.

Tony Olenichak
Deputy Watermaster
Water District #1

Tony,
As discussed earlier, new appropriations and transfers require that we obtain watermaster comment. If you would please comment on whether or not this application should be approved and/or any conditions that should be applied. Please reply to myself and Erin Retelle.

thanks,
roger.
