WATER RESOURCES
WESTERN REGION

The applicant has changed his farming operation and no longer continuously farms the 320 acres for which he has water rights. His current practice is to farm about 160 acres and allow the remaining 160 acres to remain fallow. Accordingly, in order to avoid forfeiture of the unused water rights, or diminution of the flows he has historically used, He wishes to place the unused water in the water bank.

Attached are copies of tax bills showing applicants name and a legal description, and SRBA records for the water rights 61-7151 and 61-2188. Please let me know if you need more information. Thanks!
