

State of Idaho
Department of Water Resources

RECOMMENDATION OF WATERMASTER

Application No: 72441
Water Right No: 37-2626 et al
Applicant Name: Bootjack Dairy

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application if it is conditioned as follows:
- (131) mag meter or irrigation waiver
No additional wells to be constructed
- c) ☐ I oppose approval of this application(s) for the following reasons:
- d) ☒ Additional comment:

Original well, WMIS ID A0004198. New well, driller tag D0036499. New well was constructed to replace the old, but did not yield and owner would like to try and use them both. Wells are 20 feet apart in same QQQ. Original 60-HP pump will be replaced with two smaller pumps. Owner has agreed to install hour meters on pump controls. Water rights are supplemental to Big Wood Canal Co. Wells will open discharge into canal pond and probably won't be needed during 2006. However, because of the lag times expected in transfer processing, if the wells are used prior to transfer approval, I will not take any enforcement action so long as diversions are adequately measured. There are no new water rights being added and no changes proposed which are likely to cause injury.

new well = D0036499

Meter (new?) 04552913 - YES, NEW

new site tag not visible - pump on low hole
talked about replacing 60HP w/ 2, 24HP.

Divers open to pond (?) communicate with surface,

will need: hour meters
flow tests.

4-20-2006

Phoned Hershel to leave message that I will
not take any enforcement action if he uses
both wells prior to transfer approval.

Needs to install hour meters
