

Answers to the Additional Requirements from the IDAHO
ADMINISTRATIVE CODE , Dept of Water Resources per IDAPA 37.03.08

Submitted by Thomas and Patricia Anne Townsend,
8 Granite Mtn Rd
Gibbonsville, Idaho

Referenced by the letter and number of the code:

- ciii. The design and construction of two 3/4 HP Pumps with 1 /14" P.E. suction lines are already in place and approved by the Idaho Dept of Fish and Game. One is at the northeast end of our property and one is at the southeast end of our property diverting water from the North Fork of the Salmon River. See attached maps to clarify location.
- di. Water requirements of the project are from March 15 until October 30 and only the amount of water needed to irrigate the grounds of approximately 3 acres that we own surrounding our house.
- dii. The Idaho Dept of Fish and Game, James Lukens, regional supervisor in Salmon has sent a letter to IDWR and a copy is attached, verifying the properties of the aquifer that water is to be taken from.
- ei. Copies of the deed to our property are attached for your review.
The only easement is the recorded Dept of Fish and Game Irrigation and Pump Easement dated 8/13/98 and attached for your information.
- eii. There are no other permits or approvals applied for .
- fi. We estimate that an approximate amount of \$150 per year is needed to keep the two pumps in good condition
