ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 95-8532, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before February 1, 19 92.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Witness my hand this 4th day of February, 1987.

Flow Meter		Rockwell				

2. Measurements:

Pump # 1 = 100 gpm (.22 cfs)
 Pump # 2 = 138 gpm (.31 cfs)

E. NARRATIVE/REMARKS/COMMENTS

Groundwater is being diverted from two wells at a maximum combined rate of .53 cfs (238 gpm) into two, 48,000 gallons storage reservoirs.

From these reservoirs, a gravity flow system is used to supply water to 78 accounts. Water usage is for commercial, domestic, and irrigation.

An estimated 17.25 acres of land is being irrigated. Domestic use is for 77 homes, and commercial use is for a wrecking yard garage.

When I met with Howard Witherman he explained that the original number of hookups (62) on this system has been increased to 78.

He also verified the additional places of use that are listed on the legal description.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

Measured Method:

Additional Computation Sheets Attached
See Theoretical Calculation

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 17.25 \text{ acres} \times 3.5 \text{ af/acre/season} = 60.4 \text{ afa}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .53 \text{ cfs} \times 245 \text{ days} \times 1.9835 = 257.6 \text{ afa}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 60.4 \text{ afa}$$

2. Volume Calculations for Other Uses: avg. size of lawn/garden being irrigated = 100 ft²

$$100 \text{ ft}^2 \times 78 \text{ homes} = 780,000 \text{ ft}^2$$

$$780,000 \text{ ft}^2 / 43560 \text{ ft}^2 = 17.9 \text{ acres} (\approx \text{acres being irrigated})$$

$$1.2 \text{ afa} \times 78 \text{ homes} = 93.6 \text{ afa}$$

PROOF DUE NOTICE

RE: PERMIT NO. 95-08532

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

Re: 95-8532

Gentlemen:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned Identification No. 95-8532. Please refer to this number in all further correspondence.

This office is currently in the process of advertising the application in the Coeur d'Alene Press. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to the final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Enclosed please find your Receipt No. 38159 for the amount of \$45.00.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

ROBERT G. HAYNES, P.E.
Regional Supervisor
