RE: CFS to be Licensed

The examiner recommends a total rate of 0.07 as originally listed on the permit. No actual measurement was made nor was a theoretical calculation made. The well log shows a discharge of 10 gpm. While the license should not be limited to the output shown on the well log, the rate should be limited to the amount calculated theoretically as follows:

$$\frac{2.5 \text{ hp} \times 8.8 \times .8}{265 + (2.31 \times 25)} = 0.054 \text{ cfs}$$

PROOF DUE NOTICE

RE: Permit No. 95-8336

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
