Re: 95-8207

Dear Water User:

The final stage in developing a licensed water right requires that the water system be examined by an authorized examiner. Due to the size of your system, it will be necessary for you to provide this office with a map of the existing system prior to the scheduling of the examination. This map must show the location of the point of diversion, reservoirs (if any), and each individual user. This map must also show the approximate location and size of the main line and laterals.

I am enclosing an example of a map for your information.

If you have any questions or require assistance, please contact me at this office.

Sincerely,

TOM D. KING

PROOF DUE NOTICE

RE: Permit No. 95-8207

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager
