Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be improved.

2. Next, we need to set clear goals and objectives. These should be specific, measurable, achievable, relevant, and time-bound.

3. Once goals are set, we can develop a plan of action. This includes identifying the resources needed and the steps to be taken.

4. Implementation is the next step. This involves putting the plan into action and monitoring progress.

5. Finally, we need to evaluate the results. This involves comparing the actual outcomes with the goals and objectives.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.
