Dear Mr. Brown:

Pursuant to our conversation on July 14, 1976, I have spoken with my supervisor, Robert G. Haynes, and he confirms my position on the placement of the measuring device.

The measuring device must be placed in such a manner as to measure the amount of water being diverted from the stream. The examination and subsequent licensing of your water right cannot be done until this requirement has been met.

When the measuring device has been properly installed, please notify our office so that we may make an examination of your system. If there are any questions in this matter, feel free to contact us.

Dear Mr. Brown:

One of the conditions of approval of your water Permit No. 94-7014 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before September 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
