Dear Sir:

This will acknowledge receipt of the deposition of the holder, depositions of two witnesses, and the affidavit of proof of publication from the newspaper, all in connection with beneficial use proof under the above numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made, since the department has but one field engineer who makes examinations all over the state.

However, Mr. Tolman, Field Engineer for this department, will contact you at the time set for examination so that you may show him over the grounds. After his report is on file in this office, you will be further notified as to fees due before the issuance of your license.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Shoshone Country Club
Wallace, Idaho

Boise, Idaho, **August 9, 1937**

Dear Sir:—

Under the terms of your permit No. 18362 you are required to complete your diversion works on or before October 9, 1937. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00 a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

R. W. FARIS

Re: Application for Permit

CHAS. H. FOREMAN, Agent
Shoshone Country Club
Wallace, Idaho

Dear Sir:

We are herewith returning your application for permit to appropriate 0.5 of a second foot of water from Small Creek in Shoshone County, with the request that you have this application made out on the enclosed form. The form which you used has been obsolete since 1919, when the State Engineer was succeeded by the Commissioner of Reclamation.

I believe that the bearing describing the point of diversion is in error. The application states that it will be located N. 77°25' W. 2960 feet from the S.W. corner of Section 10, Township 43 North, Range 3 East. According to this description, the point of diversion would be in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 9 whereas your maps indicate that it will be in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 10. If you change the bearing to read East instead of West, the description will agree with the maps.

After the new application has been completed, kindly return it to this Department with your maps and filing fee of \$5.00. Your application need not be made in duplicate.

Yours very truly,

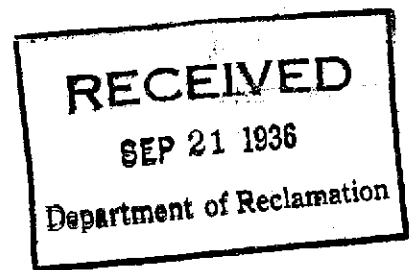

Paul L. Henry
