State of Idaho
Department of Water Administration

LICENSE OF WATER RIGHT

License of Water Right No. 17978/91-2021 Priority Feb. 2, 1960 Amount 3.0 cfs
(late proof)

THIS IS TO CERTIFY, that the CITY OF ST. MARIES
of St. Maries, Idaho, has complied with the terms and conditions of Permit
No. 17978/91-2021 issued pursuant to Application for Permit dated July 16, 1934,
and has submitted proof to the Department of Water Administration on February 11, 1971,
that he has applied water to a beneficial use; an examination by the Department indicates that the
works have a capacity of 3.70 cfs, and that the water has in fact been applied to a
beneficial use; a right to the use of water from Rochat Creek
tributary of the St. Joe River is hereby confirmed in the following amounts:

Amount 3.0 cfs for Domestic from Jan. 1 to Dec. 31 (both dates inclusive)

Amount _____ for _____ from _____ to _____ (both dates inclusive)

Amount _____ for _____ from _____ to _____ (both dates inclusive)

Subject, however, to the condition that no more than 3.0 cfs of water be diverted at
any one time, said waters to be diverted within the _____

SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 3, Twp. 46 N, Rge. 1 W, B.M.

in the county of Benewah; and that the amount of water so diverted and to which such
right is entitled and confirmed is for the purposes aforesaid and is limited to the amount which can
actually be beneficially used ~~and shall not exceed~~ ~~xxx feet per acre~~

Description and location of place of use: City of St. Maries & Vicinity

**NOTICE OF EXISTING
WATER PERMIT**

Notice is hereby given that the City of St. Maries, St. Maries, Idaho, has received an approved Permit No. 17978 91-2021 issued by the Idaho Department of Water Administration authorizing the diversion of 3.0 cubic feet per second of water from Rochat Creek, tributary to St. Joe River. The priority to be established under this permit is February 2, 1960, and the permit was approved July 25, 1934.

Water is to be diverted by a water main from a point within the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 3, T. 46N, R. 1W, B.M., Benewah County, to be used for municipal purposes in the city.

Proof of the application of the water to beneficial use was submitted to the Department on February 11, 1971. Any protests against the issuance of the license for the above referenced permit should be filed with the Idaho Department of Water Administration within ten (10) days of the last date of publication of this notice.

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF IDAHO

Application No. 25161
Permit No. 17978
District No.

1. Name of Applicant: CITY OF ST. MARIES

Postoffice address: St. Maries County: Benewah State: Idaho

I. If applicant is a corporation, give:

- (a) Date and place of incorporation: Incorporated as a City, April 16th, 1913.
(b) Amount of capital stock:
(c) Amount paid in:
(d) Names and addresses of directors:

II. The financial resources of the applicant are:

- (a) Cash on hand:
(b) Treasury stock
(c) Bonds to be issued:
(d) Other resources:

2. Quantity of water claimed: 3 cubic feet per second.

3. Source of water supply: Rochat Creek which is a tributary of St. Joe River.

4. Location of point of diversion: S. 42° 7' W. 2966.5 feet distant from the NE corner of Section 3, T. 46 N., R. 1 W., B. M., and is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 3, T. 46 N., R. 1 W., B. M., County of Benewah

5. Water is to be used for: Municipal City Water System

6. If for mining, milling, power or manufacturing purposes, give:

- (a) Point of use of water: feet distant from corner of Section T. , R. , B. M., in the of Section , T. , R. , B. M.
(b) Amount of power generated: H. P., under feet head.
(c) Water is to be returned to at a point feet distant from the corner of Section , T. , R. , B. M., in the of Section , T. , R. , B. M.

7. Estimated cost of works: \$ 105,600.00

8. Kind of works: Concrete Dam with 43748 feet of Cast Iron or Steel Pipe.

9. Height of dam 10 feet; length of dam at top 57 feet; length of dam at bottom 20 feet; material used in dam: Concrete & Steel Reinforcement.

10. Size of headgate: Width 3 feet; height 4 feet.

11. Ditch: Width at bottom feet; width at water line feet; depth of water feet; dimensions of flume:
Diameter of pipe 14, 12, 10, 8 inches; length of conduit 8 $\frac{1}{4}$ miles.
Average grade per mile 30.88 feet.

12. The time required for the completion of such work is 5 years.

13. The time required for the complete application of the water to the proposed use is 6 additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. (a) Is reservoir to be used? No If so, fill in (b) and (c) below.
(b) Name of Reservoir and number of Storage Permit:
(c) Date of filing of Application for Storage Permit and Name of Applicant:

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

City of St. Maries, Idaho

Applicant.

By Walter Boberg, Clerk

Agent.

Date of first receipt at Department of Reclamation: 9:00 A. M. July 16, 1934

Returned to applicant for correction:

Corrected application received:

APPROVAL OF COMMISSIONER OF RECLAMATION

The number of this permit is 17978

Recorded in Book 64 Page 17978 Approved July 25, 1934.

This is to certify that I have examined the within application for a permit to appropriate the public waters of the State of Idaho, and hereby approve the same, subject to the following limitations and conditions:

Bond in the sum of \$ to be filed on or before

Work to begin on or before September 24, 1934

and to continue diligently and uninterruptedly to completion,

unless temporarily interrupted by circumstances over which permit holder has no control.

One-fifth of the work above specified to be completed on or before January 25, 1937.

The whole of said work to be completed on or before July 25, 1939.

Beneficial use of water appropriated in accordance herewith, to be made on or before July 25, 1945.

Witness my hand this 25th day of July, 1934.

R. W. FARIS

Commissioner of Reclamation.

LICENSE ISSUED FOR 30 CFS FT
LICENSE PAG

February 23, 1983

Ona Hedgecock, City Clerk
St. Maries, ID 83861

Dear Mrs. Hedgecock:

Thank you for your inquiry dated February 10, 1983, regarding the status of water rights for the City of St. Maries. An investigation of our files finds that currently the City of St. Maries has two recorded water rights.

The first water right, identified as license No. 91-2021, indicates a rate of flow of 3.0 cfs (1344 gallons per minute), for domestic use within the city. This licensed water right is fully valid and no further action is required by the city with respect to this right.

The second recorded water right in the name of the city is identified as claim No. 91-4001. This claim indicates that the first use of water from Rochar Creek began on July 16, 1934. This water right is also for 3.0 cfs and it appears that this may be a duplicate filing to the above-referenced licensed water right. At this time, the claim is in a valid status and no further filing is needed on your part.

For your convenience, we are enclosing copies of the license and claim. If they identify the current use of water by the City of St. Maries, no further action is necessary on your part. If you do have additional uses, please contact our Northern Regional office located at 4055 Government Way in Coeur d'Alene. Personnel in that office will be happy to assist you with filing the proper documents.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section

Re: St. Maries Water System

Dear Mr. Ballou:

I am summarizing some information on the St. Maries water system which may be of benefit to you.

The water supply for St. Maries is derived from ^{SW₁} Rochet creek at a point approximately eight miles from the city. The low rock-fill diversion structure is located in the NE₁ of Section 3, T. 46 N., R. 1 W. Water is conveyed to a 500,000 gallon distribution reservoir in St. Maries by approximately 44,000 feet of 12-inch steel pipeline, reportedly constructed in 1937.

Water is diverted from Rochet creek at a nearly constant rate of approximately 2.4 mgd. We measured the diversion rate with a pitot tube near the diversion works. Measurements are probably accurate within a plus or minus ten percent. When the system demands are less than the diversion rate, water is spilled at the distributing reservoir. The peak hour rate of system demand exceeds the capacity of the 12-inch pipeline and the difference is made up by flows from the reservoir.

We also measured the inflow at the .5 mg reservoir at approximately 2 mgd. The difference is attributed to leakage, upstream users, and measurement error. With the present facilities it is essential that the Rochet creek pipeline is not throttled at the downstream end. The resulting increase in pressure causes failure of the old 12-inch pipeline.

I trust this information will be helpful to you. If there is any additional information we can supply, please advise.

Very truly yours,

CHRONIC & ASSOCIATES

ATTN: Mr. Tony Peterson

Gentlemen:

A field examiner from our Department has recently attempted to make the required examination of the water system for the City of St. Maries. He was unable to make a measurement of the water that is being used from Rocket Creek.

It was brought to our attention that your Association has made a study on their system. It would be very helpful to our Department in issuing the Water License if you could furnish the following information:

1. The quantity of water measured.
2. System description.

Any information you could supply would be greatly appreciated.

Very truly yours,

Fred Eisenbarth
Water Resource Supervisor

Gentlemen:

Enclosed is a legal notice which we wish to have published for two consecutive weekly issues of your newspaper. We have inserted the publication dates, allowing ample time for you to submit to us a galley proof for our review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication date. If you cannot publish the notice on the proposed dates, please contact the Department of Water Administration immediately.

The expense of the publication is to be paid by the City of St. Maries,
St. Maries, Idaho, to whom you should furnish
an affidavit of publication.

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor

Re: City of St. Maries, Idaho

Dear Sir:

The City Clerk has shown me your letter of June 4 referring to advertising authorization sent to the City of March 29th. We had in our file what seemed to be verifax copies, and at the bottom of the notice was an authorization which I have now signed as City Attorney, and I enclose the same herewith.

My impression was that this notice or something had been published recently in the paper. But I do not have the copy of this publication, and I may be in error on this. At any rate, we wish to comply, and if something further is required will you let me know. We certainly appreciate your assistance and cooperation in this matter certainly which we have several times proved we are abysmally ignorant.

Very truly yours,

Re: Permit No. 17978/91-2021

City of St. Maries
St. Maries,
Idaho 83861

Gentlemen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use in connection with the above referenced permit. Enclosed you will find an Order which advances the priority under this permit to February 2, 1960.

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a permit holder to make proof of beneficial use.

The enclosed order modifies the above referenced permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a newspaper as prescribed by the Department. If you will complete and return the enclosed form, we will cause the notice to be published.

If you have any questions or if we may be of assistance at any time, please advise.

Very truly yours,

BOBBY D. FLEENOR
Assistant Director

Re: Permit No. 91-2021 - City of St. Maries

ATTENTION: Richard L. McFadden

Dear Mr. McFadden:

We are in receipt of the application of water to beneficial use and claim to a water right that you have submitted in the behalf of the City of St. Maries. We have processed the proof affidavit, but we find in reviewing the claim that we must return it for additional information.

Please note under item #2 that you should list the point of diversion as to the nearest 40 acre subdivision that it lies within. The period of use under item #3b should list only the months during each year that the water is used, such as January 1 through December 31. As soon as you have made these necessary corrections and re-submitted the claim, we shall begin its processing.

We wish to advise you that there are two (2) methods of recording water rights with this department. One of which is the claim - the other, the application, permit and license procedure. The claim should be used only for those water systems with an historical back ground of use. Any new water developments should be established under the application, permit and license procedure.

As you have indicated in your letter of February 9, 1971, that in the future you may abandon your water right on Rochot Creek for a more stable supply from the St. Joe River, you may be interested in our transfer procedure. This transfer would enable you to move your water right from the stream that it is presently located on to another more stable source, and possibly help you maintain the original priority. This procedure can take place only on a perfected or licensed water right.

We are enclosing copies of each of the above mentioned forms for your consideration. If you should have questions in reference to any of these matters, please do not hesitate to contact us.

Very truly yours,

Dorian Clay
Appropriation Examiner

Attention: Mr. Dorian Clay, Appropriation Examiner

Re: Permit No. 91-2021

Dear Mr. Clay:

I enclose herewith proof of application of water to beneficial use and claim to a water right forms which were sent to the City of St. Maries. These have been filled out to the best of our ability and signed by Mayor Otto Holstein. Our check for \$10.00 is also enclosed as directed in the last paragraph of the instructions on the back of the claim form. As indicated on the forms and as you are aware, this water right is claimed by the City of St. Maries and right now this is its sole source of water supply for citizens and residents of the City of St. Maries and also families and other water users outside the City but in proximity thereto, which the City supplies with water.

We did not realize until receiving the communications of your Department that delinquency existed in the matter of the filing of these papers, or that they had to be filed, but we are certainly concerned with maintaining this water right in good order and we do appreciate your bringing this to our attention, and if there are any deficiencies in the papers enclosed herewith or if anything further need be done to perfect or protect this claim, I would certainly appreciate your advising me of this. In one of the notices sent reference is made to 1.0 c.f.s. of water, point of diversion NW1/4 NW1/4 of Section 8, Township 45 North, Range 1 West, Boise Meridian, approved November 28, 1908. This was an old source of City water located on Thorn Creek no longer used, and I assume it is not necessary to maintain this water right.

91 2021

State of Idaho
Department of Water Administration
Page 2
February 9, 1971

The Mayor and Council have asked me to look into the matter of a possible claim of water right from the St. Joe River as a future source of municipal water to this City. The Rochat Creek water source, which the enclosed documents relate to will, we believe, prove inadequate in years to come. We have employed engineers who have made a study of this, and who recommend that as a matter of long-range planning that we give consideration to a water system which would derive its source from the St. Joe River which flows through the town. I am asking your advice as to whether this water right should be claimed now, or should this be done only when the plans are complete for changing over from the existing system to the new one?

We, in this area, are not very familiar or conversant with water rights or the proper method of claiming or maintaining them. We therefore ask the assistance and cooperation of your department in keeping us lined out on this.

Again, we appreciate your bringing this matter to our attention. We hope that the enclosed papers will serve to protect and maintain our existing system, and that you can advise us further with respect to the contemplated change.

Very truly yours,

McFADDEN & PARK

Re: Permit No. 91-2021

CITY OF ST. MARIES, IDAHO
602 College Avenue
St. Maries, Idaho 83861

ATTENTION: R. G. Martins - City Clerk

Dear Mr. Martins:

Pursuant to your letter of January 8, 1971, please find enclosed this department's proof of beneficial use forms and a claim to a water right form. If you were to submit beneficial use at this time, the priority of the above referenced permit would be reduced the number of days that the proof affidavits were late, giving you a 1959 priority, instead of 1934. If you wish to accept this reduced priority, please return the completed proof of water to beneficial use affidavit on or before February 13, 1971.

As previously mentioned, we are also enclosing the claim to a water right form that may help you in claiming your original 1934 priority, should you choose not to accept the reduced priority that would come from completing the permit at this time.

If we may be of any further assistance in this matter, please do not hesitate to contact us.

Very truly yours,

Dorian Clay

Re: Permit No. 17978 (New No. 91-2021)

City of St. Maries
St. Maries,
Idaho 83861

Gentlemen:

It appearing to the Department of Water Administration that the terms and conditions of Permit 17978/91-2021 to appropriate the public waters of the State of Idaho have not been complied with as to failure to submit proof of beneficial use of water due on July 25, 1945,

you are hereby notified that under the provisions of Section 42-311, Idaho Code, as amended, said permit is hereby held for cancellation, and you are required to show cause before the Director of the Department of Water Administration on or before February 13, 1971, why said permit should not be cancelled.

Permit 17978/91-2021 claims the use of 3.0 cubic feet per second of water, the point of diversion was to be located within the SW 1/4 of Sec. 3, T. 46N, R. 1W, B.M. and the permit was approved July 25, 1934.

Re: Permit No. 17978.

Mr. Harry Dewey,
Dep. Commr. Reclamation,
Boise, Idaho.

Dear Sir:

Relative to the height of the dam, for which we sent proof of completion recently, it appears I made an error; the dam above ground level is only 7' the total from bedrock to top is 37', in order to have substantial footing it was necessary to excavate approximately 30'.

I wrote to Mr. Tiggelbeck, our Supervising Engineer, relative to this matter, principally to get two copies of the plans and specifications of the dam, but have not heard from him yet, however, if it is necessary to send these before "Proof of Completion" can be issued, I will write him again.

Yours Very Truly

Walter Boberg

Re: Permit No. 17978

Mr. Walter Boberg,
City Clerk,
St. Maries, Idaho.

Dear Sir:-

We are in receipt of your proof of completion of works affidavit.

We note that the conditions of your reservoir have been changed over the original application; namely, the height has been increased from 10 to 37 feet, and the dam has been changed from reinforced concrete to Ashlar stone masonry.

The Department of Reclamation is required to pass on all structures over 10 feet in height; and in accordance with this, we would like to have two copies of the plans and specifications, and the acreage of the drainage area.

When these plans and specifications are approved, one copy will be returned for your files.

The fee for Completion of Works under your permit is \$5.00/

County of Benewah

Walter Boberg, Clerk, St. Maries,, being first duly sworn, upon his oath deposes and says:

First: That he is the holder and owner of Permit to appropriate the Public Waters of the State of Idaho, No. 17978, and that his postoffice address is St. Maries, Idaho
State of _____

Second: That the name of the stream from which said water is to be directed is _____

Rochat Creek

Third: That the point of diversion of said water is S. 42° 07' W. 2966.5 feet distant from the N.E. corner of Section 3, T. 46 N., R. 1 W., B.M., and is in the SW 1/4 NE 1/4 of Sec. 3, T. 46 N. R. 1 W. B.M.

Fourth: That under the terms and conditions of said permit, construction thereunder was required to be completed by Nov. 20, 1937, 1937.

Fifth: That the use for which said water is intended is Municipal City Water System

Sixth: That on the date above mentioned, the works constructed under said permit were (or were not) fully completed and consisted of the following: see remarks

I. Kind of works: reservoir, dam and pipe line

(Reservoir, dam, ditch, flume, pipe or otherwise.)

II. Dimensions of work: _____

(a) Height of dam 37 feet, length of dam at top 80 feet, length of dam at bottom 10 feet. Material used in construction Ashler stone masonry

(State whether wood, earth, stone or concrete.)

(b) Capacity of reservoir two acre feet.

(c) Size of headgate: Width three feet, height six feet.

(d) Conduit 12" pipe width at bottom 12" feet, width at water line 12" feet, depth of water 6 feet; diameter of pipe 12" inches, average grade per mile is about 33 feet. Length of conduit is 8 1/2 miles.

(State whether ditch, flume or pipe.)

Seventh: That said works are capable of conducting to the place of intended use three second feet of water.

Eighth: That water appropriated under said permit is available for none acres of land described as follows: _____

Ninth: Remarks: That dam was not finished on time due unfavorable weather conditions; the contractor was released from that portion of the contract and the city finished it on November the 11th, 1938. The structure, as finished, was designed to permit additional storage, if needed; with of dam at bottom 12', top 5'.

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

**City Clerk
City of St. Maries,
St. Maries, Idaho**

Boise, Idaho, **May 4, 1939**

Dear Sir:—

Under the terms of your permit No. 17978 you are required to complete your diversion works on or before July 25, 1939. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

JAMES SPONFORD
Commissioner of Reclamation.
