One of the conditions of approval of your water Permit No. 87-7007 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before February 1, 1972. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. Dear Mr. Paul:

We are herewith returning your application for permit, as we find in reviewing this application, that you have failed to list a number of necessary items that we will require before we can consider this application complete.

Please note that under item 3a, you will be required to list the point of diversion as to the 40 acre tract, Section, Township, and Range, that it lies within. Item 4 should list the quantity of water in cubic feet per second, with the nature of use, and the period during the year during which the water will be used. Item 5 should list the total quantity of water that you are intending to appropriate. If the water is to be used for irrigation, then you must also complete item 8b, add c, and also items 9a and b. You should also complete the map on page three of the application.

The filing fee for this application is based on the quantity of water that you are intending to appropriate. This fee can be determined from page three of the enclosed instructions.

If we may be of any further assistance in helping you to complete this form, please advise.

Very truly yours,
