CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.0 afa per acre for the lands above.

RE: WATER RIGHT NO. 35-08826

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the point(s) of diversion and the place(s) of use description. Please review carefully and if you concur, sign the amendment and return with the \$50.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of CONDITIONS/REMARKS proposed for the license when it is issued. These conditions/remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

Shelley W. Keen

RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for Right 35-08826 are based on the information below:

F. FLOW CALCULATIONS

The recommended capacity has been reduced based on an adjustment to the theoretical calculation. The efficiency rating has been changed to the standard .7. The pumping level has been increased to 74' rather than the static level of 64'.

$$\frac{8.8 \times .7 \times 2 \text{ hp}}{74' + (2.31 \times 22 \text{ psi})} = .10 \text{ cfs}$$

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	4-01 to 10-31	.06	8.0
Domestic	1-01 to 12-31	.02	.6

The domestic rate has been adjusted. With the current guidelines of including domestic lawns, gardens, etc. in the irrigated acre total, the domestic recommendation is reduced to an internal use rate of .02 cfs.

The domestic volume recommendation has also been adjusted to the standard, internal use recommendation of .6 af.

RE: Application for Amendement of a Permit for 35-08826

Keith Wilson asked if it would be necessary to amend the permit to show the correct section number on the POU and P/D before this right could be licensed. He felt that the error had been IDWR's, not the applicant's, and requiring the amendment would unfairly burden the applicant.

Keith's field inspection for this permit found that the place of use is in more than one quarter-section. Therefore, an amended permit is required regardless of the incorrect section number. I called Keith today and recommended using the amendment correcting the quarter-section description as an opportunity to correct the section number as well.

Returned is the proof of beneficial use form submitted to the department on January 10, 1990.

For the diversion rate of 0.10 cfs, where the uses are multiple in nature (domestic and irrigation), there is a license exam fee of \$50.

Also, please indicate the person you wish the department to contact when it is time to conduct the field inspection.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P35-08826

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

RE: Application for Permit No. 35-8826

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Morning News. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor
