Total number of acres irrigated: 2.5

PLACE OF USE:

DOMESTIC, same as IRRIGATION use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The use of water under this right shall not give rise to any claim against the holder of a senior water right based upon the theories of forfeiture, abandonment, adverse possession, waiver, equitable estoppel, estoppel by laches or customary preference.

Dear Brenda,

We were told upon purchasing the property that we could get shares to water from the Aberdeen Canal Co., however, we didn't. There is not even a headgate there so the only water used to irrigate has been ground water.

The property was purchased by us in March of 1988 and the well has been the only source of water used. I understand that the well was put in in 1975.

Yes, the lower area is included. Much of the property is taken in roads and canal with easements and there are two large strips running lengthwise in the field where the sprinklers do not reach. Therefore, only about half of the property is irrigated.

Sincerely,

Clasene Bennett

RE: PERMIT NO. 35-08754

Dear Water Right Holders:

I am currently in the process of reviewing the above referenced permit for licensing. However, I need some additional information above what the Department's field examiner collected during his 1992 exam.

A portion of the section your irrigated acres are in is also shown to be irrigated with Aberdeen Springfield Canal Company water. Before the license can be issued, I need to know if you are currently using surface water shares in conjunction with the groundwater. If the surface water has never been used or you quit using it at some point in time, when did the well water become the sole source of water for your irrigation needs?

Also, the permit is for 2.5 acres of irrigation. Does this also include your lawn area or is it separate?

I will enclose a copy of the permit for your reference. I will hold any further processing for thirty (30) days. Thank you for your assistance and if you have any questions, do not hesitate to me. My telephone number is (208) 327-5452.

Sincerely,

Brenda L. Chapman

RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	4-01 to 10-31	.07	10.0
Domestic	1-01 to 12-31	.02	.6

The domestic rate is reduced to coincide with the recommendation for an in-house only volume. This adjustment concurs with the current guidelines for processing combination domestic and irrigation rights.

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Rita Fleck

PERMIT APPROVAL NOTICE

Department of Water Resources

RE: PERMIT NO. P35-08754

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

This well was drilled Aug. 12, 1977 by Doug Cushman (phone 785-4977) for Larry Packer and has been in use ever since. It pumps 50 gal. per min., has an 8" casing for 1-19 ft. It has a 5 H.P. and 3/4 H.P. submersible pump in it. The 5 H.P. is for irrigation and the 3/4 H.P. is for the house.

RE: Application for Permit No. 35-8754

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Morning News. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor
