Dear Ms. Robertson:

Re: Permit No. 35-8631 (Orth Ponds, Sterling WMA)

On January 7, 1991, the department received the proof of beneficial use and the \$50 fee.

Unfortunately, I errored in requesting a fee. Water diverted for wildlife is exempt from the fee requirement. I notified the fiscal section to prepare a refund.

The next step is for the department to conduct the field inspection to confirm and determine the extent of beneficial use. I cannot tell just when the representative from our Eastern Regional office will conduct the exam, but he will try to contact you or your representative prior to being in the area.

If you have questions, please contact me.

Dear Sir,

Please accept these photos as proof that our pond construction project, Permit No. 35-08631 has been completed and is providing beneficial use.

The resulting ponds from the project provide breeding habitat and a fall staging area for ducks, geese, and shorebirds. We have placed goose and mallard nesting structures on the area and annual surveys indicate production of a minimum of 5 goose broods and 16 duck broods.

These ponds also provide an important access area to waterfowl hunters and wildlife viewers. If I can be of further assistance please feel free to contact me.

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Dear Mr. & Mrs. Christensen:

This letter is to document the discussions Tom Hemker and Lee Van De Bogart of our staff have had with you recently concerning our water right application #35-8631.

It was not our intention to develop a situation that would change our agreement with you on the existing ponds. We feel that the agreement has worked well in providing a mutually beneficial situation for both of us. The only reason we made an application was because the Department of Water Resources advised us that we were required to do so because the proposed dam would block a free-flowing stream. We included no active storage which means we have no right to fill the reservoir except with excess water that you pass down the stream from your dam. To clarify this, in the application we have added the following sentence to the "Remarks" section of the permit:

"Nothing in this permit should be construed to take priority over Carl Christensen's upstream water rights."

As discussed with you, the design will consist of a dam designed to back water to the foot of the existing dikes, but not against them. The dam will include a rip-rap overflow as well as a culvert gate to regulate depth. These specifications should minimize the chance of muskrat damage to the existing dikes as well as give us the ability to carefully regulate water levels.

Re: Applications for permit No. 35-8631

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right applications for permit. The application has been assigned identification no. 35-8631. Please refer to this number in all further correspondence.

This office is currently in the process of advertising the application in the Blackfoot News. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When the permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

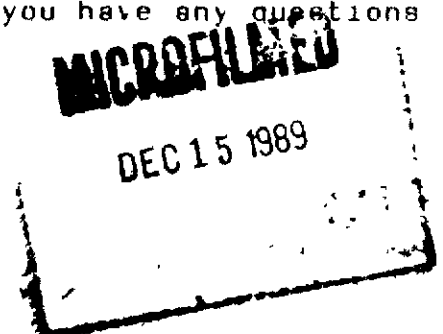

Enclosed please find your receipt, no. 39847 for the amount of \$30.00

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Ernest Carlsen
Assistant Regional Supervisor
