CONDITIONS OF APPROVAL AND REMARKS

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The use of water under this right shall not give rise to any claim against the holder of a senior water right based upon the theories of forfeiture, abandonment, adverse possession, waiver, equitable estoppel, estoppel by laches or customary preference.
5. The Director retains jurisdiction of the right to incorporate the use into a water district, require streamflow augmentation or other action needed to protect prior surface water and groundwater rights.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
7. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.

MEMORANDUM

DATE: September 22, 1995
TO: File No. 35-08590
FROM: Cindy Zimmerman
SUBJECT: Review of Beneficial Use Field Report

=====

The following adjustments were made on the field report to reflect permissible place of use:

1. Permissible Place of use. (based on SRBA recommendation of claim 35-02725)
 - a. Irrigation use on **100 acres within the system total of 112 acres.** Total system located within NESE (30 A), NWSE (28 A), SWSE (38 A), SESE (16 A), S31, T02S, R34E.
2. Rate of diversion.
 - a. Capacity, measured = $986.4 \text{ gpm} \div 448.83 \text{ g/cfs} = 2.20 \text{ cfs}$.
 - b. Capacity minus overlapping license 35-02725
= $2.2 \text{ cfs} - 1.0 \text{ cfs}$
= 1.2 cfs available for this permit.
 - c. Irrigation limited by permit to **1.0 cfs**.
3. The place of use comparison report show surface water that is probably appurtenant to the land. SRBA recommendation on 35-02725 indicates combined use of surface water from People's Canal & Irrigation Co with groundwater.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 35-08590

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

RE: Permit No. 35-08590

Returned is your Proof of Beneficial Use submitted in connection with the above referenced permit. Before we can complete processing, additional information is required.

A drilling permit is required for all wells drilled, deepened or enlarged after July 1, 1987 (Section 42-235, Idaho Code). You have indicated neither the well driller or the date the well was drilled. If the well was drilled prior to July 1, 1987, simply indicate this on the form and return it to me.

If your well was drilled after July 1, 1987, please submit a copy of the drilling permit. The well log should have been submitted by the driller within 30 days of the completion of the well. If you have a copy of the well log, please submit that as well. If you do not, please contact your driller and ask that he submit a copy.

In order to meet all of the required dates, the completed form must be returned on or before December 1, 1992. When the form is return, I will continue to process your proof of beneficial use. Please address all correspondence directly to me.

If you have any questions or if I can be of any further assistance, please feel free to contact this office.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 35-08590

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

RE: PERMIT NO. P35-08590

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

MICROFILMED

DEC 13 1989

[_____]

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Morning News. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor
