Subject: Change of ownership papers

KariLynn,

I frequently get elderly people calling to tell me their spouse is deceased, and that spouses name should be taken off the billing. However, I don't believe these folks are notifying anyone else about the changes. They need to do ownership changes, right?

Please mail the appropriate papers explaining this to:

Thelma Hennbold

PHONE 684-4638

Otherwise, please advise how to handle these in the future.

Thanks,
Terry

*Phoned Thelma - told her I wanted
send change of ownership paperwork
to her. Explained that we need something
to show her ownership of property - surviving
spouse documents, etc. Included my
card & told her to call if she has questions.
Her son is an attorney so he may assist her
with this.*

Subject: Change of ownership

Hi Terry . I pulled the file on the request you sent me for Thelma Hennbold and found that it was licensed in the name of Hans Hennbold. This seems to be typical of water rights belonging to people of their generation. It seems that the men took care of business and the women took care of the house (and the men)

In this case a change of ownership will be in order and will require something showing Thelma as the surviving spouse. Sometimes there is a court document like a personal representative's deed, or a copy of a will indicating the surviving spouse. A copy of the death certificate may be required depending on the particular circumstances

As you can see, there is no hard and fast rule on this. Each case will have to be determined on an individual basis. Please feel free to contact me on any questions you have on this. If I don't know the answer, I can ask Jeff for whatever clarification is needed.

I will send the appropriate paperwork to Thelma Hennbold.

MEMORANDUM

DATE: May 2, 1994
FROM: Jim Johnson
TO: Licensing Review
SUBJECT: Overlap Conditions

=====

The following is in reference to a situation in which two (or more) rights share a common point of diversion (a well in this case) and the water is used on overlapping acres. The permit being reviewed for licensing is a supplemental filing to bring the rate up to .02 cfs per acre.

As an aid to streamline the number of overlap conditions required, the following 3 conditions are going to be combined into 1 condition:

Existing Conditions:

1. This right when combined with Right(s) 35-02867 shall provide no more than .02 cfs per acres nor more than 4.0 afa per acre for the lands above.
2. The total combined annual volume of water under this right and Right(s) 35-02867 shall not exceed 528 af.
3. Right 35-02867 is also diverted through the point of diversion described above.

New Condition:

1. This right uses the same well as Right 35-02867 and when combined with Right 35-02867 shall not exceed an annual volume of 528 acre feet nor a diversion rate of 0.02 cubic feet per second per acre.

RE: Adjustments Made

=====

Adjustments were made on the field exam in the following portion(s) based on the information below.

G. VOLUME CALCULATIONS

I did not list the diversion volume as the examiner recommended because the combined amount (with 35-02867) exceeded the allowable amount. It is more clear to condition the license with the combined maximum allowable for all of the acres.

RE: PERMIT NO. P35-08156

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

RECEIVED
FEB 14 1990

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

RE: Application for Permit No. 35-8156

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Morning News. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
