CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The use of water under this right shall not give rise to any claim against the holder of a senior water right based upon the theories of forfeiture, abandonment, adverse possession, waiver, equitable estoppel, estoppel by laches or customary preference.

PROOF DUE NOTICE

RE: PERMIT NO. 35-08147

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: PERMIT NO. P35-08147

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

MEMORANDUM

TO: File No. 35-8147 in the Name of Richard Geisbrecht
FROM: Gary Spackman *Gary*
DATE: December 27, 1989

RE: Sufficiency of Information Submitted Under Rule 4,5.

Mr. Geisbrecht and Harold Jones of our Eastern Regional office have represented that the 311 acres listed as the proposed place of use in application for permit no. 35-8147 are acres that were already irrigated. This application is an application for supplemental use.

Mr. Geisbrecht has indicated in a letter that he began irrigating the 311 acres in 1969.

Because this application seeks development of supplemental use for acres already irrigated, and the amount sought to be appropriated is much less than 5.0 cfs, the Department should accept the information submitted by Mr. Geisbrecht at this time, and should waive any further information required under Rule 4,5.

RE: Application to Appropriate Water No. 35-8147

Dear Mr. Giesbrecht:

You filed an application to appropriate water with the Department of Water Resources on May 13, 1983. The application was assigned water right no. 35-8147. It proposed the diversion of 1.94 cubic feet per second of ground water for irrigation of 311 acres located in Power County.

Processing of the application was delayed pending resolution of the Swan Falls litigation. It now falls outside of the trustwater area and was recently advertised by our Eastern Regional office. I presume that you are still interested in pursuing development of this project.

This project proposes irrigation in excess of 200 acres. Our Water Appropriation Rules and Regulations require additional information when an application proposes irrigation of over 200 acres. I understand, however, that this application proposes development of a better water supply for acres already irrigated. I cannot tell whether it proposes the drilling of a new well, or whether new acres are being developed.

Please inform me if a new well is being contemplated. Please also inform me of whether new acres will be developed as a result of this application. Finally, please identify the new acres that were not irrigated under existing water right no. 35-7071.

It is important to evaluate whether the development will impact other water users. Please show on a map the proposed well relative to all existing wells and springs within a 1/2 mile radius of the proposed well. Please also discuss the characteristics of the ground water in the area, and whether a new well, or an increased capacity in an old well, will reduce the quantity of water available to other water users.

If you will submit the requested information, I will proceed immediately to act upon the application.

Sincerely,

GARY SPACKMAN, Manager

RE: Application for Permit No. 35-8147

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Power County Press. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.
