CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre on the lands above.
6. The total combined rate of diversion under this right and Rights 35-07106 and 35-08737 shall not exceed 5.39 cfs.

License # _____ @ _____ cfs / _____ ac

$$Q_o = \text{Total Licensed Rate} = \frac{3.79 \text{ cfs}}{315 \text{ ac}} = 0.012 \text{ cfs/ac}$$

RE: Amendment Conditions

=====

The Application for Amendment of the above referenced permit is to be approved with the following recommended conditions:

Approved provided the conditions as set forth in Permit No. 35-08063 are met.

Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.

Construction of the well must comply with Idaho well construction standards.

Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

LAPSE NOTICE

Dear Permit Holder:

Under the provisions of Section 42-218a of the Idaho Code, you are hereby notified that the above referenced permit has lapsed since the Department could not approve the request for extension of time you submitted.

You can file a new application within one year of the time you actually intend to develop a water right. Since Idaho is now under a mandatory permit procedure to develop a water right, the new application will provide an additional period of time for development, although the priority date will be later in time.

Should you wish to file a proof of beneficial use on that portion of the permit that you have developed, you must do so within 60 days of the date of this lapse notice. However, your priority date is being penalized one day for every day the proof is received late.

If you have any questions or if we can be of any further assistance, please feel free to contact our office.

Sincerely,

L. Glen Saxton
Chief, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 35-08063

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

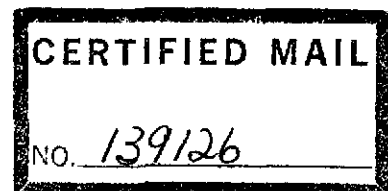

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

RE: SWAN FALLS PROCESSING

DATE: 11-27-89

=====

This application was among those applications reviewed in the regional offices last year and recommended for out of sequence processing. This application includes a statement and sufficient supporting evidence concerning development of the project prior to October 1, 1984.

The department's Policy and Implementation Plan for Processing Water Rights in the Swan Falls Area provides for applications to be processed out of sequence if the development was completed prior to October 1, 1984 and the application filed prior to July 1, 1985. These filings are not required to be processed in sequence with other trust water filings because the effect of these filings have already occurred and because, due to subordination, the filings are not taking water held in trust. These filings are not subject to the staged development policy and public interest criteria of Section 42-203C, Idaho Code.

RE: PERMIT NO. P35-08063

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

RE: Need for Additional Development Under Rule 4,5. of the Water Appropriation Rules and Regulations

In April, 1989, I sent a letter to Lenard Schritter, the applicant for applications nos. 35-8062, 35-8063, 35-8064, and 35-8066. I told Mr. Schritter his applications were exempt from Swan Falls Processing, but that he must still submit the information required under Rule 4,5.. Mr. Schritter did not respond to my inquiries.

Since I wrote the letter, we have re-evaluated our direction under Rule 4,5.. Attached is a memorandum signed by Glen Saxton which waives the requirement for obtaining information under Rule 4,5. when development is already complete.

The development proposed under the applications listed above has been complete long enough that many of the concerns that would have been resolved by submittal of the information should already have surfaced. This filing should be processed without requiring the additional information.

MEMORANDUM

FROM: Glen Saxton *GJS*
RE: NEED FOR ADDITIONAL INFORMATION UNDER RULE 4,5. OF THE
WATER APPROPRIATION RULES AND REGULATIONS: PRE-EXISTING
DEVELOPMENT
DATE: July 19, 1989

Many applications are being submitted to the department representing development which occurred several years ago. Some of these applications request diversion in excess of 5 cfs or irrigation in excess of 200 acres, prompting review under Rule 4,5. of the Water Appropriation Rules and Regulations.

The purpose of Rule 4,5. requirements for additional information is to force pre-development analysis of the application. If the development is already complete, many of the analysis criteria are of little value.

If development is already in place prior to filing of the application, the requirements of Rule 5 in some cases may be waived. The waiver of the requirements is based on the fact that many of the negative effects of the development should already have been felt or recognized. One exception, however, is when development is so recent that possible problems associated with the development may not yet have surfaced.

An analysis of the system prior to the development will help us in avoiding conflicts with other public interests which may be injured by the development.

RE: Processing of application nos. 35-8062, 35-8066, 35-8063,
and 35-8064

Dear Mr. Schritter:

The department has reviewed application for permit nos. 35-8062, 35-8066, 35-8063, and 35-8064. Development proposed by the applications appears to have been complete prior to October 1, 1984. As a result, it is not considered trustwater, and is exempt from Swan Falls processing. The application is not, however, exempt from the requirements under Rule 4,5. of the Water Appropriation Rules and Regulations. I have sent a copy of the rules for your reference. Among other things, the following must be submitted:

1. A plat showing each well and any other wells or springs within a 1/2 mile radius of each well.
2. A statement of design construction or operation techniques which will be used to reduce impact on existing rights.
3. A general statement regarding the properties of the aquifer in the area.
4. Normally a certified financial statement and project design and plans along with cost estimates must be submitted. Because the project is complete, this information is not necessary.
5. Comments should be obtained from the county, and any irrigation district or canal company whose boundaries encompass the proposed project.

Application for Permit No. 35-08063

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned identification No. 35-08063. Please refer to this number in all further correspondence.

This office is currently in the process of advertising the application in the Morning News. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

RE: APPLICATION FOR PERMIT NO. 35-8064 & 35-8063

Dear Applicant:

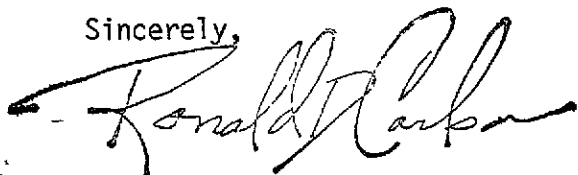

The department is now beginning the processing of applications which have been held as a result of the Swan Falls controversy. In connection with this processing, the department requests the information described below.

From the department's review of the above referenced water right application, it appears the application is only subject to the usual water right processing described in Section 42-203A, Idaho Code, and is not subject to the public interest criteria processing required of some applications in the Swan Falls settlement.

In order to process the application, the application needs to be re-advertised in compliance with Water Appropriation Rule 4,2,2,1. Please submit the readvertisement fee in the amount of \$20 within 30 days or the department will void the application pursuant to Water Appropriation Rule 4,2,2,4.

Please feel free to contact the department if you have any questions.

Dear Mr. Schritter:

In October of 1984, Idaho Power Company and the State of Idaho signed an agreement stating the Company's water rights would be subordinated to those persons who beneficially used water prior to October 1, 1984, and who filed an application or claim for said use by June 30, 1985.

To insure proper consideration of your application pursuant to the above agreement, follow the directions on the enclosed form and return it to this office when completed. For your benefit in identifying the point of diversion and place of use, included on the form is a description of the major items contained on the application.

Your cooperation in returning the completed form and supplemental documentation will expedite future administrative action on your application when processing of applications above Swan Falls resumes.
