Dear Farren,

Boise has informed us that they do not have any vehicles to lessen your water right. We talked with DEQ and compared their numbers to ours. It is evident that the amount your system can pump is significantly under what your water right allows. Because your water right has already been decreed, the Idaho Department of Water Resources Eastern Region can do nothing. However, we cannot stop you from abandoning a portion of your water right. This means that the water you voluntarily abandon will no longer be available to you or anyone who buys your property. This action would also take you out of the East Water Measurement District in the event that your water right is under .24 CFS, and covers less than five acres of ground. If you should decide to expand your park, you would not be able to reclaim the abandoned water.

I have enclosed a form for you to sign and have notarized should you decide to abandon part of your water right. This is the only option you have available to lessen your water right. We have a Notary Public available at our office for your convenience if you would like to expedite this process. If you have questions, or would like to set up an appointment, our office hours are 8:00 a.m. - 5:00 p.m. It is my hope to resolve this problem quickly and without delay. However, should I not hear back from you within a week or so, I will pursue the matter further. Thank you for your time and effort.

Sincerely,

Jason Tomsett
East Water Measurement District
