The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.

1. Measurement Calculations

- a) Field Measurement Calculations (Include theoretical capacities and system capacity)

$$Q = \left(12 \frac{\text{in}}{\text{ID}} \right)^2 \times 3.85 \sqrt{41 \frac{\text{in}}{\text{meter reading}}} = 3549.9 \text{ gpm} \times 0.990 = 3514.4 \text{ gpm} \text{ or } 7.83 \text{ cfs}$$

Correction Factor

Transf 2087 effectively assigns amts to 3 different wells to irrigate various lands of License 35-2425. On a cfs/acre basis each acre gets 0.015679 cfs. Part C1d of the transfer defines which well irrigates what acreage. I calculate that the pd in the SE SW of Sect 8 irrigates 175 acres. $175 \times 0.015679 \text{ cfs} = 2.74 \text{ cfs}$ credited to this well. My measurement of 7.83 cfs allows me to license 35-7872 for an additive quantity of 2 cfs, as requested by the permit. There appears to be 89 new acres + 151 old acres that make up the 240 acre total. It also appears that an additional 93 acres is irrigated from this well & should be covered by recent applications by Mr. Shackelford.

- b) Volume Calculations for Irrigation:

$$\begin{aligned} V_{I.R.} &= (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 240 \text{ acres} \times 3.5 \text{ af/a} = 840 \text{ af} \\ V_{D.R.} &= [\text{Diversión Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 2.0 \text{ cfs} \times 214 \times 1.9835 = 848.9 \\ V &= \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 840 \text{ af} \end{aligned}$$

- c) Volume Calculations for Other Uses:

2. Overlap Review

- a) Other water rights with same place of use:
- Tr 2087/35-2425

- b) Other water rights with same point of diversion:
- Tr. 2087/35-2425

- c) Analysis:
-
- (old acres)

$$\text{a/ } 151 \text{ acres with } 0.015679 \text{ cfs/acre from Tr. 2087} = 2.37 \text{ cfs}$$

To make 0.02 cfs/acre we need 0.65 cfs more.

- b/ (New acres)

89 new acres found need 0.02 cfs/acre or 1.78 cfs. The 1.78 cfs + 0.65 cfs exceeds the requested amt. of 2. cfs. Therefore the license is limited by the requested amt. to 2.00 cfs

Dear Mr. Vanderford,

RE: Permit No. 35-7872

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install an access port or other device to provide for the installation of measuring equipment by the Department. Enclosed are specifications for the installation of the access port, as well as a list of measuring device options.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

David R. Tuthill, Jr.
