The maximum quantity diverted shall not exceed 525 acre feet per
year.

Point of diversion: SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 25, Twp. 3S, Rge. 33E, B. M.

RE: Permit No. 35-7522

Mr. Dale W. Martin
Rt. #1
Pingree, Idaho 83262

Dear Mr. Martin:

On July 7, 1976, personnel from this office visited the well under your Permit No. 35-7522. This examination was to finalize the water permit and collect data required for the licensing of the well.

The examination indicated that the system may possibly not be operated as you stated in your proof of beneficial use. A measuring device approved by this Department has not been installed at the point of diversion. Because of this non-compliance where the measuring device is concerned, the priority date that you have established for this ground-water source may be in jeopardy.

This office will hold the field report until July 23, 1976. At that time we will submit our findings to the State Office in Boise. Hopefully, before that time you will contact this office and indicate that the measuring device has been purchased and/or installed. We will then re-examine the system with you or your representative present. Please contact me to set up an appointment for this re-examination.

Compliance with the conditions on your permit is the only way a license can be issued pursuant to the Idaho Code for your water right development and the land included under the above referenced permit.

If you have any questions concerning this matter, please do not hesitate to contact me.

Very truly yours,

BILL RHOADS
