RE: Permit No. 35-7326

Lyle & Dale Michaelson
Route #1, Box 65
American Falls, Idaho 83211

Gentlemen:

Recently, personnel from this office visited the wells under your Permit No. 35-7326. This examination was to finalize the water permit and collect data required for the licensing of the wells.

The examination indicated that the system is being operated as you stated in your proof of beneficial use except for the fact that measuring devices approved by this Department have not been installed at the points of diversion. Because of this non-compliance where the measuring devices are concerned, the priority date that you have established for these ground-water sources may be in jeopardy.

This office will hold the field report until August 22, 1975. At that time we will submit our findings to the State Office. Hopefully, before that time you will contact this office and indicate that the measuring devices have been purchased and/or installed. We would then be willing to do a re-exam to submit to the State Office.

Compliance with the conditions on your permit is the only way a license can be issued pursuant to the Idaho Code for your water right development and the land included under the above referenced permit.

If you have any questions concerning this matter, please do not hesitate to contact me.

Very truly yours,

BILL RHOADS
