August 20, 1974

Mr. Blaine Larsen
Box 32
Terreton, Idaho 83450

Dear Mr. Larsen:

We have received a well drillers report indicating that a well was drilled for you in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 1, T. 2N, R. 35E., B.M., Bonneville County.

A review of our records indicates that you have not filed an application for a permit to appropriate the public water of the State of Idaho. Since March 25, 1963, an application has been required prior to construction of a well and a valid permit must be obtained before ground water may be diverted. The only exception to this requirement is a well drilled for stock-watering or single family household use and water used for all other purposes, including irrigation of one-half acre of land in connection with the household use where the total use does not exceed 13,000 gallons of water per day.

If you have filed an application, which we over-looked in the review of our records, please advise us of the number of the application or the name under which the application was filed. However, if you have not yet filed the required application, you should do so as soon as possible. You may obtain forms upon request from this office.

Very truly yours,

LOY H. JOHNSON

Re: Water Right Permit No's 35-7323 and 35-7559

Dear Mr. Carlson:

We are writing to confirm our recent telephone conversation in which we advised that our client, Brownings, Inc., has recently acquired the land from Mr. Blaine Larson, to which Permits No. 35-7323 and 35-7559 pertain. Our clients were unaware of the status of these permits at the time of the acquisition of the property, but it does appear to be correct that no measuring devices have been installed at the points of diversion.

Since the letter from Mr. Ernie Carlson of your department did not reach Brownings until last week, it is too late this year for them to install measuring devices and have the measurements taken. We therefore wish to formally request that the completion of this matter be postponed until next irrigation season, at which time Brownings will install the appropriate measuring devices and supply the necessary information for completion and issuance of the licenses.

In the meantime, since we have no information on these water rights, we would appreciate it if you would furnish us with copies of the permits, as well as copies of the proofs filed of Application to Beneficial Use. We will also be attempting to determine whether these permits have been assigned to Brownings and to gather other pertinent information with respect to the wells.

Thank you for your attention to and assistance in this matter.

Yours very truly,

Kent W. Foster

Mr. Blaine Larsen
Box 32
Terreton, Idaho 83450

Dear Mr. Larsen:

We have received a well drillers report indicating that a well was drilled for you in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 1, T. 2N, R. 35E., B.M., Bonneville County.

A review of our records indicates that you have not filed an application for a permit to appropriate the public water of the State of Idaho. Since March 25, 1963, an application has been required prior to construction of a well and a valid permit must be obtained before ground water may be diverted. The only exception to this requirement is a well drilled for stock-watering or single family household use and water used for all other purposes, including irrigation of one-half acre of land in connection with the household use where the total use does not exceed 13,000 gallons of water per day.

If you have filed an application, which we over-looked in the review of our records, please advise us of the number of the application or the name under which the application was filed. However, if you have not yet filed the required application, you should do so as soon as possible. You may obtain forms upon request from this office.

Very truly yours,

LOY H. JOHNSON
Water Resource Supervisor
