RE: Permits No. 35-7223 and 35-7297

Mr. Jerry T. Twiggs
Rt. #2, Box 275
Blackfoot, Idaho 83221

Dear Mr. Twiggs:

Personnel from this office have attempted to complete the field examinations necessary to finalize the water permits and collect data required for the licensing of the wells.

Measuring devices of a type approved by this Department have not been installed at the points of diversion, and because of this non-compliance the priority date that you have established for these ground-water sources may be in jeopardy.

This office will hold the field reports until May 1, 1977. If at that time we have not received notification that the measuring devices have been purchased and/or installed, we will forward our findings to the State Office for final action. If the measuring devices have been installed, please contact me to set up an appointment to do a re-exam.

Compliance with the conditions on your permits is the only way a license can be issued pursuant to the Idaho Code for your water right developments and the land included under the above referenced permits.

If you have any questions concerning this matter, please contact me.

Very truly yours,

ANTHONY R. KOZLOWSKI

He does not own or irrigate the NE 1/4 SE 1/4 sec 8. Also since Mr. Twiggs has a lic # 35-2710 for 1.20 cfs for 60 acres in the W 1/2 of SE 1/4 sec 8 and there are only 77 acres irrigated, there are only 17 additional irrigated acres not licensed for a feed water per acre

Dear Mr. Twigg;

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. Re: Application for Permit No. 35-7223

Mr. Jerry T. Twiggs
Rt. #2, Box 275
Blackfoot, ID 83221

Dear Mr. Twiggs:

Your application for permit has been forwarded to this office for processing. Before the application can be approved, we must ask for clarification of Item #5 (total quantity to be appropriated).

The Idaho Code limits the rate of diversion for irrigation purposes to .02 c.f.s. per acre. You have indicated you will be irrigating 63 acres; thus, the maximum rate of diversion for your application would be 1.26 c.f.s., instead of 1.36 c.f.s. as listed on the application, unless you can provide us with written justification for the higher rate requested. A higher rate of diversion can be justified by unusual soil conditions or irrigation systems. We accept as adequate justification statements to this affect from the S.C.S. or other soils experts.

We will reduce the irrigation rate to the quantity indicated, unless you supply us within thirty (30) days, adequate justification for the higher diversion rate requested.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

NORMAN C. YOUNG
District Engineer
