Dear Mr. Funk:

One of the conditions of approval of your water Permit No. 35-7221 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Funk:

Enclosed is a copy of your approved Application for Permit No. 35-7221. We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

You should also be aware that the maximum amount of water that may be diverted upon your land is limited to one inch per acre. Even though you have two sources of water supply for your land, the maximum combined rate of diversion is still one inch per acre.

If you have any questions regarding this matter, please contact us.

Dear Mr. Funk:

We are returning your application for permit in order that you may clarify Item #1. You have listed 4 cubic feet per second for the irrigation of 160 acres. According to the Idaho Code, Section 42-202, we cannot approve more than 0.02 cubic feet per second, or one inch of water per irrigated acre, unless more can be justified. The maximum amount allowable for 160 acres is 3.2 cubic feet per second. If your soil needs more than the allowable amount, contact the A.S.C.S. or S.C.S. offices in your area and have them submit the justification to our office.

We have taken the liberty of re-typing your application for permit for your convenience. Please note that we have left Item #1 blank for your consideration. Please review all items, sign and return the application to our office, with the required fee. The fee for 3.01 cubic feet per second to 4.0 cubic feet per second, is \$55. Upon completion of these items, we can begin the processing of your application for permit.

If you should have any questions in reference to this matter, please do not hesitate to contact this Department.

Very truly yours,

Fred Eisenbarth
Appropriation Examiner
